

THE NAPANEE

Vol. XXXVI] No. 40—JNO. POLLARD, Editor and Publisher.

NAPANEE, ONT., CANA

W. COXALL

having recently gone through his stock of Crockery and found it much larger in many lines than it should be at this season of the year, has decided to place it on the market at reduced prices in order to reduce it.

Give him a call before buying and save money.

17th June, 1897.

Never Regard the Jug, but look what it Contains.

Our store is small in room, but there is lots of goods that must be cleared out at a sacrifice price to make room for our fall goods. We will state a few articles:

Men's All-Wool Suits, worth \$6.50, for \$3.25.

Youths Suits at \$2.85.

Boys 3-piece Suits regardless of value.

Waterproof Coats at \$5.00, worth \$7.00.

Straw Hats at half price.

All-Wool Pants for 95c.

We have the best Overalls at the lowest price.

Oxford and Colored Shoes at a sacrifice price.

You cannot judge the value of the goods without seeing them. You are always welcome to come and look without fear of being bothered to buy. If you will come right away you will get the advantage.

J. R. DAFOE.

The Seed and the Grave.

"In the town of Hanover, in Germany, there is buried a German Countess who denied the existence of God and ridiculed the idea of the resurrection. To further show her contempt for Christianity, she ordered that on her death her grave should be built up of solid masonry and covered by large stones bound together by iron clamps. On this tomb was engraved her defiant challenge that through eternity this tomb should never be disturbed.

"But one day the seed from some tree, either blown by the wind or carried by a bird, became lodged in a small crevice of the tomb, where soon it sprouted and began to grow. And then, as if nature had seemed to mock the haughty infidel, she quietly extended the delicate roots of that seedling under the massive blocks of stone and slowly raised them from their place. And now, although scarce four generations are passed since that tomb was sealed, that most insignificant seedling has accomplished what God Himself was challenged to accomplish."—Evangelist Moody, in Ladies' Home Journal.

Iron Contamination of Water.

A very frequent contamination of water is that arising from the presence of iron, particularly where a relation exists to coal mines, iron mines, ferruginous, and argillaceous sandstone; even ground water and well water, otherwise pure and unobjectionable, often contain salts of iron, which usually come from ochery strata. In case the geological strata consists of hard, insoluble kinds of rock, such as granite and gneiss, the water remains comparatively free from contamination, and is what is ordinarily termed "soft," if, however, the water in its subterranean course comes in contact with rocks containing components similar to rock salt, it becomes saliferous, or, if it strikes limerock, dolomite, or chalk, etc., it takes up certain quantities of them, becomes calcareous, and is in that case called "hard." In respect to the ferruginous contaminations referred to, while these in no way render the water insalubrious, it is found to become turbid and unsightly from the effect of the oxide of iron formed by the action of the atmospheric oxygen, and, when precipitated, soils drinking vessels and kitchen utensils.

CASTORIA

For Infants and Children.

The famous signature of J. C. Watson is on every wrapper.

Area of Keeping

market price and sell it on the closest margin of to be had in Canada for the money. To show guarantee, viz; that if they can buy the same our goods back and return the money paid for customers in every way, as a proof of our success business.

R. SHIPMAN, Agent.

NEWS FROM THE COUNTRY.

To Correspondents.—Persons sending in items from the surrounding district must sign their names to correspondence as a sign of good faith, not for publication. Any correspondence received without the name attached will not be published.

NAPANEE MILLS.

There are seven cases of typhoid fever in our village, but nearly all are considered out of danger.

Mr F. S. Rathbun spent Sunday with Mr. Allan.

Ed. Cavanaugh is the happy father of a son and heir.

Pat. Leveck, of Marlbank, was visiting at his aunt's on Sunday.

Miss Annie Kelly is home from New York, where she has just recovered from a severe attack of typhoid fever.

The infant daughter of Wm. Kinley died on the 5th inst.

SICK HEADACHE and Constipation are promptly cured by Burdock Pills. Easy to take, sure in effect.

MORVEN.

Miss Ada Davey left on Monday for Peterborough where she will spend a few weeks visiting her sister Miss Gertie Davey.

Those who are attending Toronto fair are Miss Emma Garrison, John Fralick and son, George, and George Clappe and wife.

Mr. Arthur Vanslyck spent Tuesday evening at Lucas Sharp's. Some attraction, Arthur.

Our boys don't believe in going alone but will take their best girl if they go to have their horse shod.

Our E. L. will reorganize in the near future.

We are to have a treat on Friday evening, 24th inst., in the form of a lecture to be given by the Sons of Temperance. There will also be a free concert by our young people. All are cordially invited to attend.

Mrs. Haycock and Miss Shorey favored us on Sunday morning with a very appropriate duet.

Mr. Drum Valteau was a guest at Wm. Funnell's on Monday night.

I wonder what is the attraction for the Sillsville boys, as a thunder storm will not stop them. Come again boys when the moon shines.

Baby was Cured. DEAR SIR,—I can highly recommend Dr. Fowler's Extract of Wild Strawberry. It cured my baby of diarrhoea after all other means failed, so I gave it great praise. It is excellent for all bowel complaints.

MRS. CHAS. BOTT, Harlow, Ont.

WILTON.

Rev. W. Coombe gave an excellent sermon on "The Second Blessing," last Sunday morning. Prof. Nicholson, Kingston, took charge of the service in the Presbyterian church Sunday

PERSONALS.

David Forward, of Bath, is seriously ill. Miss Kate Ross has returned to town.

We are indebted to Mr. M. W. Pruyn for a copy of the Manitoba Free Press. Mr. Pruyn is at present in the prairie province overseeing the harvesting operations on his large farm there. The crops in Manitoba are really excellent this year.

Mr. Thos. Gibson, of Ingersoll, spent a few days this week the guest of Miss Hattie Fox.

Dr. M. J. Beeman, of Newburgh, arrived in town from Montreal on Saturday where he was attending the meeting of the British Medical Association. The doctor says the citizens of Montreal treated the delegates like princes. Dr. Maybee, of Odessa, also attended the Convention.

Dr. Cook and wife and Miss Cook left for Toronto on Saturday after a short visit with friends in town.

Mrs. Ainsley and Miss Ainsley, of Guelph, are visiting in town the guest of Mrs. Z. A. Vanluven.

Mr. and Mrs. Everton Vanluven, of Moscow, were in town this week visiting Mrs. Z. A. Vanluven.

Commissioners Jessie Amey, Ernestown, and Cyrus Allison, of Adolphustown, were in town on Saturday.

The Misses Baker, Milliners with The Robinson Coy., have returned to town.

Miss Penton has returned to town after a visit at her home in Walkerton.

Mr. and Mrs. E. R. Sills and Mr. and Mrs. D. Shannon are attending the Toronto Exhibition.

Ben Johnson was conveyed to the Kingston General Hospital on Wednesday suffering with typhoid fever.

Mr. Orlin Herring is attending the Toronto Exhibition.

Mr. S. R. Miller left for Toronto this week.

Miss Mary Root, and brother Walter, of Napanee, are spending a couple of weeks in Picton and vicinity.

Mr. Clarence M. Warner left for Providence on Wednesday after a short visit with friends in town. "Thad" is looking fine and is doing well in Providence. He is in partnership with Mr. F. W. Shibley, an old Napanee boy.

Mrs. Chas. Stevens and Ade are visiting in Tweed the guests of Mrs. Isaac Pringle.

Miss Kate Cournoyer, of Newburgh, is visiting her parents at Tweed.

Miss Cora Fanning, of Belleville, is visiting with friends in town.

Miss Eva Lott, of Napanee Mills, is recovering from a slight attack of fever.

Miss Ila Miller, of Kingston, has been the guest of Miss Carrie Williams this week.

Mrs. W. H. Bruton is visiting in Brockville.

Miss Nellie Perry, who has been visiting her parents at Centerville, left on Saturday for Philadelphia, Pa. Miss Caton, Napanee, accompanied her as far as Cape Vincent.

Rev. W. W. Peck is spending his vacation at Toronto.

Mr. John Balfour, of Ottawa, has been visiting Mr. J. H. Madden.

Mrs. Alex Lafferty is recovering from a severe illness.

Mrs. Andrew Garrett of Brockville, has been visiting Mrs. A. Craig.

Mr. Ed. Francisco is spending his holidays in New York State.

Mrs. Fred Bell, and Miss Florence Bell, are visiting friends in Napanee.—Deseronto Tribune.

Mrs. Ezra Pringle is visiting friends at Niagara, Mrs. Dr. Wylie is the guest of her sister, Mrs. A. Karr.

W. Taylor, manager of the Bank Montreal, recently wheeled the whole distance from Deseronto to Montreal.

Miss Blanche Caton, of Napanee, is visiting friends in the city.—Miss Minnie Atkins, of Napanee, is visiting friends in the city.—Belleville Sun.

Z. A. Vanluven, A. Alexander, W. F. Hall, F. E. Vanluven, W. T. Crouch and A. Sills were out duck hunting last week and met with fair success.

Mrs. Sidney Warner returned on Friday from visiting friends in Kingston and Odessa.

Miss Harriet E. Clark returned on Monday evening to take up residence with Mrs. Warner, John Street.

Mrs. H. A. Lake of Providence is visiting

BINSON CO.

You can buy hardware, powder, shot, shells, cheap at Boyle & Sons. Store open every day no holidays kept now.

On Monday last Mr. John Brandon passed over to his reward at his residence in Nanapan. Deceased was 86 years of age and widely known and respected. He leaves a wife, three sons and two daughters. The funeral took place to Lime Lake on Wednesday.

Mr. Wm. Tullock, a highly respected and esteemed farmer of Tyendinaga Township, passed away suddenly on Friday last, aged 65 years. Deceased leaves a wife and eight sons, eight brothers and eight sisters to mourn his loss. It is said of him that he hadn't an enemy in the world. He was a Scotchman and noted for his integrity, probity and industry. The funeral took place on Sunday to Lonsdale and was one of the largest ever witnessed in that vicinity.

Here's a marriage notice that appeared in an exchange: "Married at Flintstone, by Rev. Windstone, Mr. Nehemiah Whitestone and Miss Wilhelmina Sandstone, both of Limestone." This isgetting mighty "rocky" and there is bound to be a blasting of these "stony" hearts before many "pebbles" appear on the connubial beach. The grindstone of domestic infelicity will sharpen the ax of jealousy and discord and sooner or later one or the other of this pair will rest beneath a tombstone. Then look out for brimstone.—Grafton Record.

He Followed the Advice.

"How far can you swim, Willie?" inquired the visitor.

"Oh, I don't know," replied Willie.

"Across the ocean?" persisted the visitor facetiously.

"I shouldn't wonder," answered Willie promptly.

"Why, Willie, do you know how far it is across the ocean?" demanded Willie's mother.

"Don't care how far it is," retorted Willie. "Pop told me once never to admit that I couldn't do a thing until I'd tried and failed and I never tried this." —Chicago Post.

Increasing Humus in the Soil.

Another point that does not sufficiently impress itself upon the average farmer's mind, it seems to me, is the matter of storing up humus in the soil. These sands of farmers are suffering for humus. These decaying organic matter. When straw, grass, leaves, etc., are buried in the ground, and decay there, there is supplied not only plant food from the decay, but such an improved mechanical condition of the soil also as greatly assists growth. Where soil inclines to pack, it needs just this lightening that is furnished by plowing under decaying organic matter. Stiff soils are also greatly improved by the same treatment, looking at the purely mechanical condition of the land. But there are undoubtedly other ways in which available fertility is added to the soil by such decay. Much otherwise unavailable fertility is undoubtedly set free by the chemical changes that thus take place in the decay of organic matter. The great value of humus in the soil is forcibly shown in the fertility of land reclaimed from the forest, which has carpeted the ground for generations with leaves. "Green" manuring will put humus into the soil, but its profitability will depend upon circumstances—the market value of the crop that may be turned under. For land in many situations the plowing under of green crop is undoubtedly the cheapest method of fertilizing it; but whatever one's circumstances, it is wise to turn under all the straw, refuse hay, cornstalks, etc., that cannot be used to advantage elsewhere. Best of all it is to get a second, or third, crop growth of clover to turn under when plowing. The roots in the soil, and the clover stalks above the surface, will give organic matter that will both mechanically improve the soil and likewise add to it a great store of fertility.—Practical Farmer.

The Finest Road for Cycling.

Mr. John F. Fraser, now cycling in the far east, says there are not three consecutive miles of road in England so good for wheeling as the 1200 miles stretch of road from Lahore to Calcutta. He declares the Indian Ganges Trunk roads to be the finest in the world.

Did you say a clothes wringer for \$2.00, yes at Boyle & Son, go and see them, only

TOWN COUNCIL.

(COUNCIL CHAMBER, Nanapan, Sept. 7th '97)

Council met in regular session, Dr. Leonard presiding, present, Madole, Carson, Miller, Perry, Boyle, Ming.

The minutes of last regular session were read and adopted.

A communication from Denis Daly offering to pay two-thirds of the cost of a granite walk around his residence was read and on motion the offer was accepted and a four foot walk will be built this month.

Mayor Ward entered and took the chair.

On motion it was decided to lay a cement walk four feet wide, from F. W. Smith's residence to the post office. Reeve Leonard was in favor of a 4 1/2 foot walk as that was the width of the post office walk. Coun. Carson was not in favor of making the walk 4 1/2 feet wide—four feet was wide enough. It was all well enough to say the walk at the post office was 4 1/2 feet wide. We didn't want to imitate the extravagance that had characterized the building of the post office.

Deputy reeve Madole thought a four foot walk was wide enough. It was only a matter of \$1.75 at the most but it was these little things that had put us where we were.

Reeve Leonard did not agree with this. He believed it was the big thing, waterworks, bonuses, etc., that had placed the town in its present position.

On motion of Ming and Carson the walk recently taken up in front of U. Wilson's was ordered to be laid down on east side of John St. from Dundas to Mill Sts. outside line of trees.

Coun. Miller was requested to wait upon the secretary of the Fire Underwriters Association while in Toronto in reference to the rating of the town.

A petition from Dr. Cowan and M. J. Warner asking on behalf of the ratepayers on the east side of John St. that a cement walk, 6 feet wide, be laid down upon that street, the ratepayers along the street to pay half the cost of the walk, was read and referred to the Street Committee to report.

A similar communication from Thos. E. Anderson and D. S. Warner, agreeing to pay half the cost of a granite walk in front of their property was read and referred to the Street committee.

Edward Roberts asked that his taxes for 1897, amounting to \$11, be remitted as he was in straitened circumstances. The matter was referred to the Finance Committee.

Mr. Percy, who occupies the town property, was heard in reference to enlarging the store he occupies, he agreeing to pay the cost of the improvements providing he was granted a five years lease of the property. The matter was referred to the Town Property Committee.

A by-law was introduced to levy the rate for the current year. The rate was struck at 27 1/2 mills for schools and general purposes.

ACCOUNTS.

B. Johnston	\$14.00
T. Fox	12.00
J. D. York	9.50

Toronto Mail	.70
E. B. Perry	18.50
Arthur Plumley	.50

The Treasurer was granted a voucher for \$50.

Coun. Carson called attention to the dangerous condition of the covered bridge. Council adjourned until next Monday night.

Hamilton Armstrong The Leading Grocer is selling groceries provisions, flour, salt etc., at away down prices. The best 25c. Japan tea ever offered to the public, now on hand. Give me a call. Campbell House Block.

CASTORIA.

The famous Castoria is a great medicine.

Sunday morning. Prof. Nicholson, Kingston, took charge of the service in the Presbyterian church Sunday evening. The new book of praise was used for the first time.

Mrs. Sperry Shibley and Misses Ida Hicks and Marguerite Storms left Monday morning for the Toronto Exhibition.

Miss Philips, Rochester is the guest of her aunt, Mrs. H. Walker, Florida.

H. Baker and family, returned to their home in Kingsville, Monday.

J. W. Edwards attended a picnic at Sunbury last Thursday. Miss Lillian Parrott took charge of the school during his absence.

Mordy Storms is teaching at Violet until Miss Gundry is able to resume work.

Miss Ethel Clarke and Bunker Storms have left for Newburgh to attend the High School there, and Miss Frances Wallace is attending the Kingston Model School.

Lester Babcock and family spent a few days at the Bald Mountains last week.

J. W. Edwards and N. A. Asselstine did not observe Labor day but taught as usual.

Miss Beulah Mills left for St. Catharines on Tuesday to resume her studies at Demill Ladies' College.

Providence Thanked. It is with pleasure that I recommend B.B.B. for the cure of indigestion and impure blood. I had tried many medicines but received no benefit until I thank Providence, I was advised to use B.B.B., and it resulted in a permanent cure.

MRS. WM. LOCKE, Oshawa, Ont.

VIOLET.

The Hornerites are still conducting camp meetings in Mr. Robinson's Grove. The meetings are largely attended.

They intend holding a convention the last four days, commencing on Sept. 14th. The Rev. Mr. Horner is expected to be present.

Miss H. A. Guendry is still unable to take charge of her school, through illness.

Mr. Storms, of Wilton, is filling her place. Her many friends hope for her speedy recovery.

Mr. Malcolm Perry is teaching for Miss Maybee, fourth concession, who is attending the Toronto Exhibition.

Mr. Nicholas Corner has been visiting friends in this vicinity. He is a descendant of the founder of this place, which was formerly known as Comer's Mills. His many friends are pleased to see him.

Miss Edith Mills, of Kingston, has been calling on friends in this place.

Mr. R. C. Snider has been appointed sexton of the church in the place of Mr. W. Brandon, who has resigned. The time of service has changed to the afternoon instead of the evening, as formerly.

Mr. Jno. Ballantyne is building an addition to his barn. Mr. W. Gilchrist, of Morven, is doing the carpentering work.

Mr. S. G. Hoyle has built a new drive shed, which adds greatly to the appearance of his place.

Messrs. Knight and Calvery, of Inverary, are attending the camp meeting and visiting Mr. Davis.

WANTED.

Men and Women who can work hard talking and writing six hours daily, for six days a week, and will be contented with ten dollars weekly. Address, NEW IDEAS CO., Medical Building, Toronto, Ont.

The secretary of the Nanapan Horticultural Society received the following this week.

GRIMSBY, SEPT. 4th, 1897.

Sir,—I have a little illustrated account of the Grimsby Horticultural Society and its officers for the Sept. number of our journal. Can you not send us a sketch of your society at Nanapan and its officer for some details of homes and gardens with photographs and favor

L. WOLVERTON, East Ontario Fruit Experimental Station.

MISS HARRIET E. CLARK returned on Monday evening to take up residence with Mrs. Warner, John Street.

Mrs. H. A. Lake of Providence is visiting friends in Nanapan, Emsworth, Portland, and Kingston, during September.

Mrs. H. A. Lake, of Providence and Mrs. Finkle, of Nanapan, spent Wednesday with George W. Shibley, and family, at Rose Lawn, near town.

Judge and Mrs. Wilkison left for Kingston on Monday evening, and before returning will visit Ottawa.

Dr. Cowan with Mrs. Cowan and children left for Princeton, on Wednesday.

Douglas Hooper Esq., of Newburgh, spent Saturday and Sunday with Mrs. J. D. Ham.

Mr. and Mrs. Biesenthal, of Pembroke, were visiting Mr. Lang, over Sunday.

Mr. and Mrs. D. S. Warner returned from Toronto on Wednesday evening.

Mr. W. S. Herrington attended court in Newburgh on Monday last.

Mr. George W. Shibley spent Sunday with friends in Kingston.

Mrs. Dr. Meacham, Odessa, is ill with acute rheumatism.

Mr. Edward Spourle is visiting in Odessa, after an absence of five years in the States.

Mr. and Mrs. Sidney Denyes, Odessa, are attending the Toronto Fair.

Miss Imogene Brown, of Phillipsville, is visiting in town.

Rev. E. T. Evans has been presented with a buggy and harness by the congregation of St. Albans, and the congregation of Hawley have supplemented it by presenting Mr. Evans with a fine colt.

MARRIAGES.

GOME-TYNER.—On the 1st inst., at Christ Church, Tamworth, by Rev. J. R. Sermon, Mr. Christopher Gome to Minnie eldest daughter of Mr. John A. Tyner, both of Sheffield.

Herbert Grooms, the fifteen year old son of Mr. N. B. Grooms, of Richmond, passed quietly away on Friday last after a lingering illness with that fell disease, consumption. Deceased was mute and had been attending the Deaf and Dumb Institute at Belleville. He was a very bright boy. The funeral took place on Sunday.

It is now generally believed that County Treasurer Vanluven is not in the land of the living. Since his departure, no one has seen him, and it is probable that he committed suicide. It has been discovered that \$20,000 cannot be accounted for, and this sum does not include street-railway bonds, valued at \$6,000. As soon as the audit is completed by Mr. Murray, County Auditor Lang will open a court here for further investigation into the books.—Kingston News.

Mrs. Philip Freeman, passed away at her home in Colebrook on Sunday, aged about 65 years. Deceased had been ailing for some time with heart trouble, which was the cause of her death. Her husband preceded her to the grave some few years ago. She leaves a family of five boys and three girls. Deceased was a highly esteemed and respected resident. The funeral took place on Tuesday from the Wilton cemetery, Rev. Anderson conducting the services.

On Friday afternoon an old man created considerable excitement by falling down in a fit in front of the Tichborne House. He was given a ticket to Kingston by the town after he recovered. It would appear that the old chap is quite an adept at the "fit business." We notice by our exchanges that he had a similar one in every town he visited. Upon his arrival at Kingston he had a bad attack in a street car and of course was conveyed to the hospital. He gave his name as Myers.

Miss Rutten, of Sydenham, arrived in town on Monday night and on Tuesday she imbibed too freely of intoxicants. In the afternoon she went up to the G. T. R. station and purchased a ticket for Kingston. The girl hung around the station, and although she was not misbehaving herself, a number of boys were bothering her, and one of the officials telephoned to the police to have her removed. She was placed in the lockup at 2 o'clock, p.m., and shortly after 8 o'clock was allowed her liberty. The girl is intelligent, fairly good looking, and comes of a highly respectable family.

ONE HONEST MAN

DEAR EDITOR—Please inform your readers, that if written to confidentially, I will mail, in a sealed letter, particulars of a genuine, honest, home cure, by which I was permanently restored to health and manly vigor, after years of suffering from nervous debility, sexual weakness, night losses and weak shrunken parts. I was robbed and swindled by the quacks until I nearly lost faith in mankind, but thank heaven I am now well, strong and strong, and wish to make this certain means of cure known to all sufferers. I have nothing to sell and want no money, but being a firm believer in the natural brotherhood of man, I am desirous of helping the unfortunate to regain their health and happiness. I promise you perfect secrecy.

Address with stamps: WM. T. MULFORD, Agents Supplies, P. O. Box 90, St. James, Que.

A GENERAL BANKING BUSINESS

The efforts of the authorities in endeavoring to stamp out the followers of the scarlet woman, who have too long been granted a free rein in Napanee, will meet with the hearty approval of all our citizens. These moral lepers should be either "drummed out" of town or sent to gaol.

LAST week's Beaver contained an editorial article from Mr. Whitney's Junk Shop in Toronto. It is but one of a number of articles prepared at headquarters and which appear simultaneously in the Conservative press throughout the province. The article in question is an attack upon the Hon. John Dryden's management of the model farm, at Guelph and capital is sought to be made out of the fact that it is not self sustaining. The Model Farm is for the purpose of experiment, education and instruction on the lines of stock and general farm improvements and has proved of great value to the progressive farmers of Ontario in demonstrating to them by tests and experiments the right mode of tilling the soil to secure the best results for their labors. It is wholly unnecessary to enter into a defence of the Model Farm for its utility and benefit to the province is recognized by all successful and wideawake farmers' and by hundreds of farmers' sons who have taken a course of instruction in the college. The old, stale, and unprofitable falsehood about the Central Prison piggery is adverted to. The report of 1896, which gives the receipts and disbursements of that and the preceding year, shows that despite the heavy loss caused by an outbreak of hog cholera necessitating the destruction of many animals, and the burning and rebuilding of the piggery, a balance of \$1,046.77 remains to the credit of the industry. Had it not been for the cholera outbreak the balance would, no doubt, have been several times

THE SLAVE OF LIQUOR

IS NOW TO BE COMPLETELY CURED
BY THE BLOOD OF HORSES.

The Astonishing New Experiments by
Dr. F. W. D'Evelyn to Cure Alcoholism in Man—What "Equization" Is
The Inherited Taint.

Science holds out now a new lamp of hope to the rum-ridden.

The man who has not will enough of his own to leave drink alone, the wabble-spirited victim who has come out uncured from the racking ordeal of the gold cure, and sees nothing before him but ruin, infinitely worse than death, may read this story and pluck up new courage. There is another chance for him, after all.

The new treatment is called "Equization." It is to alcoholism what vaccination is, and for a century has been, to smallpox.

That bold experimentalist, Dr. Jenner, chose the cow as a medium for his war against the smallpox plague.

It is the horse which Dr. Fred W. D'Evelyn, the head of St. Luke's Hospital, in San Francisco, has selected with which to fight the demon drink.

But Jenner's valuable discovery of the value of vaccine virus, unspeakable boon though it was to humanity, had by no means the scope of the new rum cure. For this marvel "Equis" promises not alone to wean the drunkard from his love of the cup, but to drive out from the blood of innocent children the taint handed down to them from generations of wassailing forebears.

Dr. D'Evelyn's discovery is the result of fifteen years' study and experimentation on the subject of alcoholism and the hereditary transmission of the alcoholic tendency. He has settled to his own satisfaction the much-mooted question as to the number of generations which such a taint must travel before it is eliminated by natural causes. The conclusion is that the great-great-grandchild cannot be counted free from the curse, even though intervening generations strive by abstinence and right-living to overcome it.

This condition of inherited alcoholism Dr. D'Evelyn calls alcocytemia, from the "alcocyte," the new element of corpuscle which is established in the blood by saturating it with strong drink. The aim of the new process is to destroy this element by neutralization, and restore the system of the "alcocyte" child or of the "alcoholized" drunkard to the condition it was in before drink was ever heard of.

Dr. D'Evelyn was a surgeon in the English army in Zululand when he began his experiments to this end. He chose the horse as the most available animal for the working out of his theory, because of the plentitude of its blood, its freedom from disease, and because, being thoroughly domesticated, its food and hygiene can be had under perfect and unremittent control.

The beasts chosen for experiment were first found by careful veterinary examination to be in perfect health. Then they were subjected to incessant administrations of alcohol, the amount being increased in a constant ratio.

The effects were found to vary as they do in men. Some horses accommodated an incredible quantity of stimulant without showing any injurious effect from it for a considerable time. Others suffered at once in appetite, nerves and temper.

By chemical tests and by distillation it was proven that the alcohol became an element in the blood. The corpuscles were changed in character, chemically and biologically; the blood was an altogether different matter after rum had done its work. It was this altered corpuscle to which the scientist gave the name of alcocyte, and which, he has demonstrated, is transmitted from parent to offspring, implanting in the inebriate's child the deadly fondness for drink.

The process by which the horse's blood is to be converted into an agent for the emancipation of the slaves of liquor is briefly this:

When the animal has been thoroughly subjected to alcoholic treatment its blood is tested. If it be what is termed "ripe," or thoroughly alcoholized, it is drawn off into a sterilized vessel which contains alcohol and is mixed therein to influence the clot.

For twenty-four hours it is allowed to settle, then it is subjected to intense cold, and after a thorough shaking for the space of half an hour is decanted. The residuum obtained is of a pale reddish yellow or straw color, slightly sticky and nearly transparent.

This "equis," which is to restore the happiness of homes, save up the waste money of hundreds of thousands of salaries, reduce the population of mad houses and distribute peace and pro-

Liver Ills

The only Pill to take with Hood's Sarsaparilla.

POULTRY RAISING

Some Hints to Beginners—The Market
The Chief Aim, After All.

If one could carry out the ideas advanced in books on poultry-raising, both for eggs and for meat, and make it a specialty, and, having overcome every difficulty, and succeeded just as the books and pamphlets argue, and would make one a successful man or woman in that line, the main item would still be to make sales and handle the cash. In order to do this one must study the markets at each particular season. He must be observing, shrewd and good at figures. Above all things he must not despise the day of small things. It is easy enough, if experience teaches that it will do, to branch out and enlarge, much easier to add than to shrink and contract, viz., with safety for your capital. You need also a good honest commission man in the city.

A young man writes: "I have a few hundred dollars to invest; will it do for me to buy six or eight acres at \$50 per acre and engage in poultry-raising for a living business? Shall I look to egg-production or raise for meat? I am young and have a wife. I think I should like the business."

We answer if you and your wife like the business, yes; engage in it. Right management will yield eggs in midwinter. If these come to market in good condition they will sell for a fair price. But there is competition on every large farm where suitable buildings shelter the fowls and where feed grain is so abundant that no one even thinks of feeding the hens, they can help themselves. On such places there also is a great plenty of offal from the table and the dairy.

The thrifty and frugal housewife sees to it that the scraps go to the hens and chickens. We seldom feel curds now; they have come into disrepute, but in former years while living on a large farm, curds were made and systematically fed to the chickens.

The hen house should be roomy, so that the birds are not crowded; it should be light and warm, and on the poultry farm, should have in it a stove for heating the room in case of a bitter cold night, and of these we have more or less every winter. This stove and fixings should be so arranged as to be well secured against fire; also have guards of some kind to prevent the hens from lighting upon it, and thus burning their feet. The south side, especially, and more or less the east side, should have large glass windows and double sashes. When one comes to examine the matter by figures these things are not very expensive. The windows need not be large, and should, on the outside, at least, be guarded by wire fencing of small meshes.

The yards, each for a separate breed, should all center in the building, which, of course, should also be partitioned so that while the fowls could see each other they could not mix.

To raise "fancy stock" is not the idea at all; but to have select and choice breeds, certainly is. I have known a farm where no new blood had been introduced for years; the breed of "ding-bills" had run out so that a full grown fowl dressed would only weigh about one and a half pounds. It certainly could not be profitable to raise such stock. Young male birds should dress at least four to eight pounds. These are only hints, which we hope may be of use to new beginners.

Care of Milk For Factory.

Since the hot weather has come we hear of great quantities of milk returned to patrons because of being sour and gritty when it reaches the factory. At the Ontario factory on Monday morning, July 5th, over 15,000 pounds was returned. The following suggestions will

The Leading Canadian Tree Men

The Napanee Express

NAPANEE, FRIDAY, SEPT. 10th 1897.

OLD SOL worked overtime on Labor
Day.

THERE is a charming indefiniteness
about the utterance of Mr. Whitney.
In opposition he has never brought
forward a reform of any great moment,
but judging from his remarks he
would be a wonderfully clever fellow
if he was only somebody else.

ANOTHER canard has been nailed.
Wm. Smith, Ex. M.P., made a state-
ment to the effect that Hon. John
Dryden sold the office of Registrar of
Deeds for the County of Ontario.
Mr. Dryden brought the slander into
court and the bold Mr. Smith made an
abject apology.

It seems impossible for Ontario
Conservatives to conduct a campaign
without introducing sectarian issues.
An attempt is even now being made to
set Catholic against Protestant in the
hope of gaining a party advantage.
"The facts for Irish electors," and the
disturbance over Ontario Separate
Schools met with the fate it deserved
and we feel that the attempt to create
discord by dragging the sacred name
of religion into a political campaign
will result in the complete discomfiture
of the crafty damogogues who resort
to such damnable tactics.

word, not to do, have been several times
that sum. The Hon. John Dryden has
proved himself an able, capable and
economical Minister of Agriculture.
He is a farmer, who farms, and has
a practical knowledge of the needs and
requirements of the agriculturists of
the province. The benefit of having a
practical farmer as Minister of Agri-
culture has long been realized by those
engaged in this industry and is in
marked contrast to the policy of the
late Conservative regime which con-
sidered a brewer or a lawyer good
enough for such a position.

FROM OUR EXCHANGES.

Brockville Recorder.
Hon. John Dryden did build a
"piggery," but he didn't steal the pigs,
which is more than can be said con-
cerning several institutions run by the
late Government at Ottawa.

Dundas Banner.

Those tory journals which are
calling out for "a change" do not say
whether they want a change of con-
science or a change of shirt.

"I would give you something if you
were not intoxicated."

"Yes, boss, but yer see I had ter get
drunk ter get up nerve enough ter ask
for the price of a bed."

White Soot.

A good story is told of an incident
that took place a short time ago on board
an English ship. The ship had been
to "clear up decks for division," it be-
ing Sunday. When the upper-deck
sweeper was about to sweep the deck
he observed a lot of soot coming from
the cook's funnel. The sweeper called
the cook's mate up and pointed out to
him the state the deck was in.
"But," said the cook, "I cannot help
the soot coming up."

"Yes, you can," said the sweeper; "it's
the usual routine to whitewash the
coals on Sunday."

The cook, being a very green
binner, went and whitewashed every
hump of coal he had in the coal box to
get white soot.

PRECEPTS AND WARNINGS FOR
THOSE WHO WOULD DIE WELL.

Let thy faith be fixed in the wonderful
transforming powers of Diamond Dyes;
the results they give will cheer thine heart.

Never allow any interested or wily dealer
to recommend for thy use some inferior or
imitation make of dye. If thou wilt
hearken to his words, he will rejoice at thy
simplicity of character and will delight
himself over thy wrath and bitter dis-
appointment.

If thou wouldst avoid handling poisonous
ingredients, use only the Diamond Dyes
for thy home dyeing work; they are only
only harmless and pure dyes.

When times are hard and money scarce,
thine heart often craves for new and
stylish colors and garments. By the use
of the magic Diamond Dyes thy wishes
can be fully realized, because Diamond
Dyes recreate old dresses and make them
to look like new.

If Thou wouldst have a smiling face, a
happy heart and an easy mind, do thy
coloring at all seasons of the year with the
Diamond Dyes; they never cause worry or
grief to those who make use of them.

TO REMOVE WORMS of all kinds
from children or adults. Dr. Low's
Worm Syrup is a safe and sure remedy.

Nature's Medicine. Nature's Medicine
for constipation, liver complaints, sick head-
ache, biliousness, jaundice and sallow com-
plexion is Laxa Liver Pills. They are a perfect
laxative never griping or causing pain. One
pill each night for 30 days will cure constipa-
tion.

spority over a gin-cured world.

"It contains," Dr. D'Evelyn says in
his report, "the essential element of the
alcoeytic blood—a chemical reaction of
alcohol on the blood compound." Re-
peated experiment upon alcoholic victims
has proven that the cures which "equiza-
tion" effects are complete and lasting.

Equisin plaques are prepared by satu-
rating chemically pure bibulous paper
with the equisin. These are baked in
a hot air chamber, and when cool are
placed in sterilized glass jars.

Their use is effected by making a lit-
tle wound upon the arm of the patient
and applying the equisin plaque to the
wound. It is fastened in place with
strips of court plaster and two or three
drops of sterilized water dropped upon
it to insure a uniform moist surface. The
moistening is repeated after twelve hours,
then requires no further attention. It
remains in place four or five days. The
application is repeated weekly for eight
or nine weeks, no stimulants, sedatives,
narcotics or crude chemicals being per-
mitted during the time.

In the case of children Dr. D'Evelyn
advocates equization every seven years,
except in grossly apparent cases, when
the application should be continuous for
two years. He says, finally:

"Owing to the universality of the taint,
I contemplate the importance that all
children from four years upward be
equitized."

Called a Halt.

An English headle was lately much
exercised at the appearance of a strange
old gentleman who, when the sermon
was about to begin, took an ear trumpet,
in two parts, out of his pocket and be-
gan screwing them together.

The headle watched him until the pro-
cess was completed, and then, going up,
whispered: "Ye mauna play that here!
If ye dae I'll turn ye out!"

Not Strong Enough.

A Texas murderer, who was a car-
penter, watched with keen interest the
erection of the gallows upon which he
was to hang. An hour before the time
set for the execution he said to the
jailer: "I observed the making of that
gallows. The steps are not strong, and
I'm really afraid they'll fall down with
me and break my neck!"

A King's Outing.

Every summer the King of Spain goes
to the seaside, and is taken out to bathe
in a splendid machine constructed like
a miniature palace. He is attended by
an admiral, and in the vicinity of the
bathing place a number of sailors are
stationed in a boat in case of any acci-
dent.

Why They Gave It Up.

Mrs. Bradish—I thought you were go-
ing to spend the summer in your cottage
out on the lake shore?

Mrs. Huntley—we did intend to do so,
but we've had to give it up.

Mrs. Bradish—Why, is it impossible
for your husband to attend to business
and go so far out every evening?

Mrs. Huntley—Oh, no, he could do it
all right; but our hired girl's beau
can't.—Cleveland Leader.

A Criticism.

"Those verses," remarked the elderly
man, "have a very agreeable sound. But
there's too much in them about 'rumm-
ing brooks' to strike the popular chord."

"But it's something that most poetry
has in it."

"If that's the case, it explains why
most poetry is not popular. The public
just now isn't caring whether the brooks
run or not. What it wants is to see the
factories get started.—Washington Star.

A Compromise With Conscience.

"Did you say," said the dramatic
critic, "that this pugilistic scur is in the
habit of making a punching bag of any-
body who speaks slightly of his his-
toric talent?"

"That's his custom."
"I don't like to mislead the public. I
guess the best thing to do will be to re-
fer to him as 'an actor of great power.'"
—Washington Star.

Timely Warning.

"Don't you believe all you see in the
funny papers about summer girls and
their engagements just for fun," said the
sad-eyed man.

"Why not?"
"I thought I had met that kind of girl
last summer; but she married me good
and tight before the year was out,"—
Philadelphia North American.

Seeking Information.

Petie—Mr. Dudds, do you ever have
any trouble on the beach?

Mr. Dudds—I don't understand, Petie.
What do you mean?

Petie—Why, sister says you're not the
only pebble on the beach, an' I was
a wonderin' if you had en trouble wid
de udders.—Philadelphia North Ameri-

proved helpful.

See that the cows drink nothing but
pure water, and breathe air untainted
by bad odors. That green, scum-covered
pond hole must be shut out.

Milk with clean, dry hands, and keep
the milk free from stable dust or other
contaminating particles.

Strain at once thoroughly, then run
the milk through an aerator, or if you
have none use the dipper freely pouring
and stirring.

Then cool the milk down and stir again
before retiring for the night. A deep
shotgun can filled with cold water may
be set in the large can of milk to do
the cooling. Most expert choosemen now
consider aeration more important than
cooling, but when the latter is done
in conjunction with the former the milk
will certainly keep sweet longer.—Loun-
don Farmer's Advocate.

Patent for Fattening Pigs.

The most ingenious scheme ever de-
vised by the Yankee mind was that of
a man who wished to claim as exclusiv-
ely his plan for fattening hogs by a won-
derful method. The plan was this:
Three piggins were built, one having
several lean scrub swine, known as
"razor-backs," the central one being
empty, and the third containing the
bloated animal which it was desired
to fatten. The scheme was to let the
fine pig into the central yard and let
him eat all he could out of the trough.
When he had so much as he could hold,
a hungry pig would be let in, and, of
course, begin to eat. It being a pig's
nature to eat as long as it saw another
pig do so, the man reasoned that the
full pig would immediately set to work
again and take another meal. When
the razor-back was full he was to be
taken out and a third hungry pig
brought in, when the same performance
would be gone through again.—Phila-
delphia Times.

Good News From Missouri.

Robert Cornwell, a Barton County
(Mo.) farmer, living near Golden City,
after numerous experiments, thinks he
has succeeded in developing a potato
that will grow without vines. They
grow entirely underground, and will do
away with the fear of potato bugs,
which cost so much to destroy each sea-
son, not to mention the damage they
do. A field planted with the vineless
potato may be worked with the ordinary
harrow. Should the new potato prove to
be a good producer, as Mr. Cornwell
hopes, it is likely to supersede the pre-
sent variety.

Bean Straw For Sheep.

It has been well attested that bean
straw is a valuable feed for sheep,
and that they are fond of it. The bean, like
clover, is a leguminous plant, and many
farmers say that the straw, though
coarse and harsh, has nearly as much
nutrition as clover hay. It makes a
very rich manure when fed to either
sheep or cows. That is shown by its
rotting very fast when piled and giving
off the strong smell of ammonia which
comes from feeding any manure rich in
nitrogenous nutrition.—Dakota Field
and Farm.

Pious Female—Do they have matins
in this church?
Old Man—Yes; mum; but they 'as
oil-cloth up t' the pulpit.—The Sketch.

Ways of Women Fair.

"The apparel oft proclaims the man,"
she quoted.
"The lack of it the woman," he added;
and as she happened to be in a ball
gown at the time she naturally con-
sidered the remark personal.—Chicago
Post.

Mrs. Primpas—Before we were mar-
ried, John, you said you would anticipate
my every wish, and now you won't buy
me a new wheel.
Primpas—Well, I did anticipate your
wish, but I did not promise to satisfy
it.

Bitter Disappointments

And Family Grief That
Can Be Avoided.

**PAIN'S CELERY COMPOUND BRINGS
HEALTH, JOY AND HAPPINESS.**

You are willing to confess, poor sufferer, that you have been bitterly disappointed with past efforts, and that in your estimation your future seems dark and gloomy.

You and your friends alone are to blame if disease is tightening its chain around you, making you a sure captive for the dark and dreaded grave.

Why keep a wife or husband in feverish anxiety, daily bending over you with tearful eyes and almost broken heart? Why cause your children's voices to be hushed, and their childish sports and games to be disregarded and cast aside? They certainly cannot enjoy life when they see a father or mother in the agonies of suffering and deep in mental despair.

You can change the scene by changing and bettering your physical condition. In other words, you can be cured and made well again by the use of Paine's Celery Compound.

Your efforts, up to the present, to throw off the encircling and deadly bonds of disease have been vain and futile. Your doctor's well meaning work has not been productive of cheering results, and you are wasting money on medicines that can never meet your case.

Being assured of new health and life by the use of Paine's Celery Compound, you are sinning against heaven and false to your family and friends if you refuse to make trial of the great agency that has saved thousands in the past.

Paine's Celery Compound is the grandest disease banisher that medical science ever devised, and has the indorsement of our

DAD'S OLD BREECHES.

When dad has worn his trousers out,
They pass to brother John;
Then mother trims them round about,
And William puts them on.

When William's legs too long have grown,
The trousers fall to hide 'em;
So Walter claims them for his own,
And stows himself inside 'em.

Next Sam's fat legs they close invest,
And when they won't stretch tighter,
They're turned, and shortened, washed and pressed,
And fixed on me—the writer.

Ma works them into rings and caps
When I have burst the stitches.
At Doomsday we shall see (perhaps)
The last of dad's old breeches.

SHERLOCK HOLMES, JR.

My Wonderful Reasoning He Effects the
Capture of a Bicycle Thief.

"Ha!" exclaimed Sherlock Holmes, jr., the great bicycle thief-catcher, "yonder goes our man. You say the wheel that was stolen from you was a seventy-two gear, with ram's horn handle-bars?"

"Yes," replied the man who had been robbed.

"Good," said Holmes. "That is the kind yonder fellow rides. I can see at a glance, too, that he uses a stolen wheel."

"Wonderful!" his companion ejaculated. "How is it possible for you to tell all this by merely glancing at him?"

"Easy enough, my dear sir, if you know how," the great detective answered. "Look at his hands. You see they are sunburned only upon the bony surfaces just above the thumbs. If he used the old-style handle-bars, his hands would be sunburned all over the backs."

"Most extraordinary deduction I ever heard of," said the citizen.

"Now," continued Sherlock Holmes, jr., "notice his walk. You see it is just an ordinary gait. If he rode a low-geared machine he would move with quick, nervous steps. On the other hand, if his wheel was high-geared, his steps would be slow and firm. But he walks along in just a common way, hence the bicycle that he rides is a medium gear."

TIMELY FRUIT NOTES.

HOW GROWERS SHOULD TREAT
SHRUBS AND VINES JUST NOW.

Hints That, If Heeded, Will Make Considerable of a Difference in Next Year's Crops—Every Farmer Is Really Interested in This Subject.

Keep the raspberries pinched back. August is the month in which to bud peach trees.

Use the suds from the washtubs as fertilizer in the orchard.

Always select trees with a smooth, healthy looking bark.

See that no suckers are growing from the roots of the fruit trees.

Cut out all of the old canes from among the raspberries now.

Proper thinning of the fruit gives it a better opportunity to develop.

August is one of the best months in which to set out strawberry plants.

Now is a good time to check growth by pinching back the terminal buds.

Late cultivation is often detrimental by not allowing time for the new wood to ripen.

Sort all fruit to be sent to market carefully, and in this way increase its value.

Prune out all useless shoots in young fruit trees before the growth is completed.

All wood that is more than two years old should be cut out of the gooseberries.

Use hardwood ashes liberally among the small fruits and in the garden.

When fruit is thinned the parent plant is exhausted far less than when all is allowed to remain.

One advantage in selecting a reasonably dry soil for an orchard is that it permits of deeper setting.

Coal ashes applied liberally around the fruit trees will help to keep away insect pests.

Before setting out strawberry plants, be sure that the soil is worked into a fine tilth.

Good growth now practically determines the value of bearing canes and vines next season.

Small and inferior berries are often the result of letting the vine get too thickly matted in the rows.

One objection to too low training in the orchard is that it interferes with the cultivation.

A good mulch properly applied keeps down weeds and renders the soil loose, moist and porous.

Every farm should have an orchard for home use, proportioned to the necessities of the family.

The safest way to get rid of orange rust in raspberries is to dig out every affected plant and burn it.

If fruit trees are kept carefully trimmed from the beginning they may easily be given the desired form.

For family use, especially, plant the orchard with a view to having the fruit ripen at different times.

The orchard can be made to serve two

A THRESHER'S LIFE

One of Exposure to Inclement and Changeable Weather.

He Easily Falls a Prey to Disease—Rheumatism One of the Natural Results—One Who Suffered for Upwards of Nine Years Gives His Experience.

From the Intelligencer, Belleville, Ont.

It is doubtful if there is any other occupation more trying to the constitution than that of the thresher. Exposed to the rains and storms of the autumn season, and at the same time choked with the dust consequent upon threshing, he easily falls a prey to disease. Mr. Jos. H. Davis, a resident of the township of Wicklow, Hastings county, follows the threshing machine for some months every fall. For eight or nine years he was subject to attacks of inflammatory rheumatism. The disease usually made its appearance in the fall, and continued through the winter, causing not only much suffering but great inconvenience. Mr. Davis' most serious attacks occurred during the winter of 1893. It first made itself manifest by the swelling of the right hand, and before twenty-four hours had passed the disease appeared to have gone through the whole system, and the legs were swollen to an abnormal size, so much that the joints were not visible through the swellings. For ten months the trouble continued and during that period Mr. Davis was unable to put on his own clothes, and the pain he endured almost passed comprehension. One doctor after another was tried but without any beneficial results. Then advertised medicines were tried but with no better success. "I can hardly say," said Mr. Davis, "how much money I spent on doctors and medicine, but it amounted to a considerable sum, and yet I would most willingly have given my farm to be rid of the terrible pain I was forced to endure. But all my expenditures seemed of no avail, and I began to despair of a cure. At this juncture, acting on the advice of a friend, I began using Dr. Williams' Pink Pills. The first six boxes I used seemed from outward appearances to have had no effect, and I felt almost like giving up in despair. I thought, however, that possibly that was not a fair trial for one in my condition and I procured a further

best doctors, lawyers, public men, merchants and others. Its curing powers are wonderful, prompt and sure, and it keeps every man and woman permanently cured.

IMPROVED HITCHING POST.

An Easy Means of Preventing the Horse From Tramping the Grass.

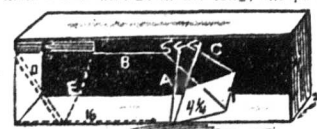

When one places a hitching post beside a driveway on the lawn, the grass all about the post is quite sure to be utterly destroyed by the feet of the horses, since horses will move all about a post to which they are hitched, even when harnessed to a carriage. This makes an unsightly spot, and one where, very quickly, a pool of water will stand

IMPROVED HITCHING POST.

after every rain. The cut shows an "improved" hitching post described by a correspondent of The Country Gentleman, who says he first conceived the idea of beating the post just outside the roadway, in the grass, using the double swinging iron arm, with its snaffle, to hold the horse off the grass. This works well with most horses, but some will throw the arm over the top of the post, and so get on to the grass with all four feet. This is obviated by using the chain, as shown in the cut. This permits the arm to rise just far enough to reach the bridle of the horse, with play enough so that he can move his head freely, but does not permit him to throw it over upon the other side of the post. This device of using an arm to keep the horse away from the post accomplishes more than the preservation of the grassy soil. It keeps the horse from gnawing and disfiguring the post, and from rubbing his bridle and other parts of the harness against it—often to the serious injury of the harness.

The Boss Rabbit Trap.
Use six-inch fencing boards or scraps of any inch lumber, but side pieces should be six inches wide. Cut four pieces six inches wide and 24 inches long; one piece

THE BOSS RABBIT TRAP.

six inches wide and four inches long for back end, making box 4x10x23 inches inside. Hang the door in front end, at range treadle and trigger as shown, using a couple of tacks in bottom of trap for the treadle to rest against when tilted. The treadle can be taken out for repairs when needed. A and B are made of wire; door and treadle of half-inch lumber. Dotted line D shows position of door when down. E shows track of lower edge of door when lifting to position F. A couple of staples will hold wire B in position. When the rabbit steps on treadle T, it pulls the wire B out of C, letting door fall. For door hinges, use wire nails with heads cut off, and driven into edge of door. How made in sides with gimlet larger than nails, to work easily, and not bored up through.

CASTORIA.

The fac-simile signature of *Chas. H. Plutchkin* is on every wrapper.

Doan's Kidney Pills. Doan's Kidney Pills act on the kidneys, bladder and urinary organs only. They cure backaches, weak back, rheumatism, diabetes, congestion, indigestion, Bright's disease and all other diseases arising from wrong action of the kidneys and bladder.

"This is simply astonishing," declared the man at the detective's side. "I will tell you how you would know that the fellow rides a stolen wheel." The great thief-catcher drew a long puff from his cigarette, permitted the smoke to circulate freely through his lungs for about a minute and a half and then replied: "Look at his nose." "His nose!" exclaimed the other. "Surely you can't tell whether a man is a thief or not by simply looking at his nose?" "Not in all cases," Holmes responded, "but in such cases as this it is the simplest thing in the world. You see the end of his nose has been exposed to the sun. It has just begun to peel off. Well, what does that signify? Merely this, my dear sir, the fellow has not dared to buy a cap for fear of rousing suspicion, so he has been getting along with a common hat, with the result that I have pointed out."

The wonderful man then walked up to the thief, clapped a pair of handcuffs upon him, and when the evidence, as set forth here, was in court, there was nothing left for the culprit but to confess and receive his sentence of imprisonment at hard labor for life.—Cleveland Leader.

"Gentle Treatment." "Even notices in medicine run to the experimental, as I have occasion to remember," tells a citizen whose word is never called in question. "I visited an old aunt of mine this summer, and, while reveling in rural enjoyments, I fell out of a cherry tree. There seemed to be a general jarring and shaking up of the system, that I thought demanded the attention of a doctor, but aunt rides herself on knowing more than half the men who practice medicine, and is committed to the old school of economy. She would bring me round all right. It would be a shame to send for a high-priced physician just to relieve a few bruises. Of course I was sore internally, for that was to be expected."

"The first remedy administered was catnip tea, which I took with that rebellious spirit begotten of childhood experiences. Then wild onion poultices were scattered all over my person. Failure of relief caused my feet to be soaked in hot water and wood ashes, the latter discolored my legs so aggressively that I kicked the bunk at once and repudiated the treatment. This was accepted as a pronouncement of 'brain fever,' and a red-hot mustard draught was applied to the back of my neck. To the same end my head was thoroughly soaked in spring water. I entered a special complaint as to my side, and a poultice of grated horseradish was the answer. In response to a demand for some exhilarant I was given sassafras tea. I was disposed to insist on brandy, but this was another brain-fever symptom, and more spring water was quaffed into requisition. At length I curtly and emphatically hired a neighbor to go for a reputable physician."

"Did he meet a cure?"

"O, yes; I had a broken rib."

"How a broken?"

"Not he," says his wife can't put the baby in his lap when he is running the lawn-mower."

"He is traveling incock."

"Traces?"

"Yes, he took the name plate off his wheel before he started."

HAMILTON GROANS.

Are Turned to Song—And Pairs are Effectually Dispelled by the Greatest of All Pain-Cures—South American Rheumatic Cure.

Mr. J. McFarlane, 146 Wellington Street, Hamilton, says: "Was very bad with rheumatism for many weeks—cured by bottles of South American Rheumatic Cure." Mrs. Phillips, Sr., corner Hunter and Gaith streets, Hamilton says: "South American Rheumatic Cure is the quickest relief for rheumatism I ever tried." Mrs. Parkin, Binbrook, says: "I had sciatica so badly I could not put my feet to the floor; pains were intense. Great relief from one bottle—4 bottles completely cured." Mrs. J. S. Bates, Grandford, writes: "South American Rheumatic Cure is the best remedy in the world for acute rheumatism. Have tried it and know." Sold by A. W. Grange & Bro.

Pain in the Back. DEAR SIR.—I was troubled with pain in the back for months, and after trying several remedies without effect, thought I would use Haygarth's Yellow Oil. I am glad to say that after using two bottles I was completely cured, and cannot recommend the excellent remedy to any one. MISS ANNA CHAPMAN, South River, Ont.

The orchard can be made to serve two purposes—the production of fruit and as a range and feeding ground for poultry.

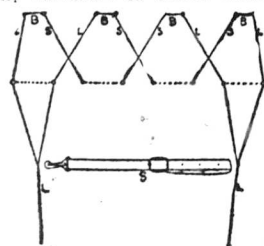

Apples should be picked as soon as ripe. If there is delay the apples will fall off and more or less of the crop will be lost.

FOUR-HORSE LINES

An Arrangement Excellent Adapted for Field Work.

"Can you tell me how to drive four horses abreast with two lines, and without jockey sticks?" was recently asked us.

For field work the arrangement shown in the sketch presented herewith is perhaps as good as any. Put the ordinary checklines on outside horses as

HOW TO DRIVE FOUR HORSES.

shown by L. Have four coupling straps made with snap on one end and an adjustable loop on the other end, by means of which its length can be readily adjusted. Separate cut (S) shows how straps are made. The loop works in hame ring, while the snap fastens to bit (B). Snaps may be used on both ends.

Another arrangement is to use rows on outside horses, same as here shown, and instead of the four coupling straps, use but three, and with these couple the horses heads together right through.—George T. Pettit, in Agricultural Epitome.

Watering Plants.

In one of our horticultural papers, says T. Grenier in Practical Farmer, I find quite a discussion about the proper time of watering plants, especially whether the watering can be safely done in sun-shiny weather or not. It seems to me that this is a case like that of the best time of pruning trees. Somebody hit the nail pretty well on the head when he said: Prune when the knife is sharp. When shall we water? Surely when the soil is dry, and if that be in hot, sun-shiny weather, I would water all the more quickly. There may be some plants that cannot stand the direct application of water on the foliage, and for them it is advisable to put the water on the soil rather than on the plant. But that is a good thing for almost all plants, anyway. For instance, in watering celery, cabbage, strawberries, potatoes, etc., the right way is to let the water run down between the rows, and soak into the ground until the latter is well moistened through. I would do this in bright weather just as quickly as I would in cloudy weather or at night, and I can say that I have never seen a garden vegetable injured by watering thus either in bright or dark weather. So far as the crops in the greenhouse are concerned, I have always watered indiscriminately, whenever I found the soil dry, and all the more freely when the sun was shining brightly. Indeed, our friends interested in greenhouse crops are well aware that the rule is to water lettuce only when there is a prospect of bright weather, and even then preferably through underground pipes or tiles. The chief point is to water thoroughly whenever you do water, and then wait until the soil gets dry and needy again. Mere sprinkling is seldom of much account, and in outdoor operations sometimes seems to be an injury.

Roup and Small Chicks.

The best method of treating a flock of hens afflicted with roup is to administer this remedy in the drinking water. Put one quart of water add ten drops of tincture of aconite. Air-shackled lime sprinkled on the floor of the house and on the ground outside the house, and even in the nests, will prove a good disinfectant. If the chicks are kept away from the hens they will probably escape the disease.

Shortness of Breath. "Since last year I have had serious heart trouble caused by malaria. Shortness of breath, smothering spells on retiring, violent palpitation, etc., often made me gasp for breath. On procuring Milburn's Heart and Nerve Pills I found to my surprise and delight that they gave almost instant relief. I got healthy, rested, sleep, my heart troubles disappeared, and I now feel very well and strong indeed." Mr. Hugh Moore, Ingersoll, Ont., makes this statement for the public good.

condition and I procured a further supply. By the time I had used three boxes more there was a considerable improvement noticeable, and from that out each day found me growing better. I continued using Dr. Williams' Pink Pills until I had taken eighteen boxes by which time I was in every respect a new man. I believe, too, that the cure is permanent for I have not known what it is to suffer with rheumatism since.

It will thus be seen that Dr. Williams' Pink Pills released Mr. Davis from the painful thralldom of rheumatism at a comparatively small expense after doctors and other medicines had utterly failed to give him even a fair measure of relief. It is obvious therefore that if Dr. Williams' Pink Pills are given a fair trial they are sure to bring relief and a cure. Every box of the genuine Pink Pills has the trade mark on the wrapper around the box, and the purchaser can protect himself from imposition by refusing all others. Sold by all dealers at 50 cents a box or six boxes for \$2.50.

Washable Waists and Dresses.

When a cotton waist is to be frequently washed, and if not lined with a piece of the same goods or with white lawn, it should have a yoke, inside or out, of the same fabric, and facing around an under the arm-sizes, this being where most of the wear comes. Round waists worn beneath the skirt should extend three inches below the waist and sleeves should have the French or bag seams, which have the raw edges put together on the right side and a narrow seam taken; then they are turned to the wrong side and a tiny seam taken, thus hiding all raw edges. If cotton plaids are made upon the bias they are apt to pull askew in the ironing. In buying embroidery to trim such gowns remember that patterns having small holes wear the best. Such dresses should be washed out quickly and dried in the shade; do not use strong soap on them. Pique, linen, crash, etc., should be well shrunk before they are made up into waists or dresses. Allowance should be made, for they are apt to shrink.

Always turn down an inch and a half at the top of wash skirts, which can be let down, when necessary. Use two threads half an inch apart in gathering the backs of skirts. Run a worsted braid along the under side of wash dresses, letting the edge barely show, and shrink the braid in boiling water before using it. In sewing on braid or velvet on hold it, not the skirt, next to you—Emma M. Hooper, in August Ladies' Home Journal.

A Reasonable Presumption.

"Speaking of bicycles," began Poindexter, when Gilfoyle interrupted him: "No one was speaking of bicycles." "But somebody was about to speak of bicycles," replied Poindexter.

The Cause.

She—I don't know what makes her so positive about everything!
He—Her sex.—Puck.

Is Your Heart Strong?

Or have you palpitation, throbbing or irregular beating, dizziness, short breath, smothering or choking sensation, pain in the breast or heart. If so, your heart is affected and will in turn affect your nerves, causing nervousness, sleeplessness, morbid anxious feeling, debility.

Milburn's Heart and Nerve Pills

Cure all these complaints by regulating the heart's action and building up the nervous and muscular system to perfect health and strength. Price 60c. per box or 6 boxes for \$2.50. At all druggists.

Merit Talks

"Merit talks" the intrinsic value of Hood's Sarsaparilla. Merit in medicine means the power to cure. Hood's Sarsaparilla possesses actual and unequalled curative power and therefore it has true merit. When you buy Hood's Sarsaparilla, and take it according to directions, to purify your blood, or cure any of the many blood diseases, you are morally certain to receive benefit. The power to cure is there. You are not trying an experiment. It will make your blood pure, rich and nourishing, and thus drive out the germs of disease, strengthen the nerves and build up the whole system.

Hood's Sarsaparilla

Is the best, in fact—the One True Blood Purifier. Prepared only by C. I. Hood & Co., Lowell, Mass.

Hood's Pills Do not purge, pain or gripe. All druggists. 25c.

"Now, Alice, come on; I'll pull, and you take the tiller."
"Very good, Jack! Is it a permanent arrangement?"
"Yes; till we're married."

Reflections of a Bachelor.

One little corn that has just come is all a girl will ever own up to.
Young men dress for women, old men for themselves, and the rest dress because they have to.
A man has lots of faith in a woman till she begins to tell him what color neckties he ought to wear.
A woman is never afraid of a man, but she often gets a curious delight out of being afraid she might be afraid of one.
The average girl spends half her time not seeing jokes and the other half going around seeing subtle meanings in things where there ain't any.
A woman often says a thing that hasn't any meaning because she knows the man will think out a meaning for it and then think she meant it.

Bismarck and the Emperor.

Bismarck, who had worn himself out in the service of Germany and of his Emperor, rarely referred to his labors for the Fatherland. One morning he and the Emperor William were riding together in the park. They had not gone far when Bismarck complained of fatigue. The Emperor, who was quite fresh, said somewhat testily:
"How is it that, though I am an older man than yourself, Prince, I can always outride you?"
Bismarck's reply was as reproachful as it was epigrammatic.
"Ah, sire," he said, "the rider always outlasts the horse."

The Latest in Organdie.

Organdies in the plain tints of yellow, pink, and especially gray, are the latest fashions in thin gowns, and some of these gowns have a flowered taffeta silk lining which gives them a very novel appearance. Plain organdies ruffled from the hem to the waist, each ruffle edged with lace, are the latest novelty, and narrow

(With apologies to Rudyard Kipling.)
A fool there was and he bought a wheel,
(Even as you and I),
Some leather and rubber and a hunk of steel,
(We knew how sore in a week he'd feel),
But the fool only thought of the miles he'd reel,
(Even as you and I).
Oh, the trouble he spent, and how double he bent!
(The fool with his leadpipe wheel),
For the dealer had seemed of honest intent,
And had told him 'twas cheaper to buy than rent,
But that wasn't at all what the dealer meant,
(The dealer that sold the wheel).
For the wheels weren't round, and the tubes weren't sound,
(The wheel that lies there on the heap);
And the tires were made of paper, he found,
While the bearings were cast-iron balls—
And he'd sell the whole thing for a cent a pound,
(The wheel that he got so cheap).

Overheard in the Park.

"Don't you think," said the girl with the blue sash, "that Charley Travers is about the silliest thing you ever saw?"
"Oh, I don't know," replied the girl with the red sash; "I think I've seen more foolish people than he is."
"But he seems such a stupid thing!"
"Does he? Perhaps he only says stupid things when he happens to be in the company of stupid people."
"Why, Jess, how you talk! You know you used to say that he reminded you of a jumping jack!"
"Mame Bruback, I never said such a thing in my life!"
The girl with the blue sash was silent for a moment. Then she rather angrily replied:
"Well, I suppose you have your own reason for being contrary to-day."

"I'm not contrary," the girl with the red sash replied, and there was a sly flash in her eyes. "If you must know it, I'm engaged to be married to Charley Travers. Don't worry, though, about a wedding present!"
Then the girl with the blue sash went over and sat on another bench, and pounced the gravel with her parasol, and thoughts—Cleveland Leader.

Johnny at the Picnic.

"We had an awful time with Johnny Potts at the Sunday school picnic."
"What was the trouble?"
"Why, Johnny wore one of these belts with a metal clasp."
"Yes."
"And after he ate his dinner we couldn't unclasp it!"
"Good gracious! What did you do?"
"We tried to file it off and couldn't get at it. Johnny squirmed and yelled like an early Christian martyr all the time. At last Rev. Mr. Gusher hired a man to take Johnny in a boat and row him out to where the water was real rough. Johnny wasn't used to rough water, and in a little while the belt dropped off of itself!"—Cleveland Plain Dealer.

Cheap Doctors.

Mrs. Greene—Dr. Jalap is such a nice man! And he is so reasonable in his charges, too! He only charged \$2 to-day. He said that these pills was nothing the matter with me, and that all I want-

PICKLES.

Some Tried Recipes That Will Generally Interest Housekeepers.

Home-made pickles are cheaper and in certain respects better than the commercial, which are usually put up in the vinegar made from acids.

Cucumber pickles are the "stand-by," and Marion Harland's new cook book gives the following recipe for pickled gherkins—as the small cucumbers are called:

Select cucumbers three inches or less in length. Lay them in alternate layers with salt in a large stone crock; let the top layer be of the salt, then pour on enough cold water to cover them and turn a weighted plate on top of them. Stir from the bottom every other day, and leave them in the brine ten days. Then pour off the brine and pick over the cucumbers, selecting those that have

up and down. Gray Swiss muslin and the over gray taffeta silk and finished with a yellow or pink satin sash and collar makes a charming dress. Silk mull and chiffon are both very popular for dresses and soft belts on thin gowns, and they are sometimes edged all around with lace.

Swimming.

Swimming on the back in sea water, says a doctor, is the most beneficial form of bathing. Swimming on the side is very injurious to the muscles of the stomach.

FARMERS ATTENTION.

Insure your property in the Lenoxx and Arlington Mutual Fire Insurance Company. Because it is a Home Company. Because it is a Safe Company. Because it is the cheapest and best. Because it affords the most liberal policies to patrons.

Because it insures only (isolated) non-hazardous risks, as farm property, county churches hall and school houses.

Because it is the Farmer's Company managed by Farmers in the interest of farmers of the Counties of Lenoxx and Addison, Hastings Frontenac, Lamoine and Leeds.

could lead. It was good food and all the rest I could get.

Mrs. Brown—Do you call that cheap? Why, Dr. Stickem, the last time I called on him, said I had a complication of diseases, just think of that, a complication of diseases, and he only charged me \$2.50 for all that. Talk of cheapness!—Boston Transcript.

Fruit on the General Farm.

Many busy farmers think that fruit growing is beyond them and that their time can be more profitably utilized in general farming. As a result thousands of country homes are deprived of the most helpful and at the same time inexpensive of all luxuries. No kind of fruit bought in the market is equal to the home-grown article, and the farmer's table will never be liberally supplied until he has his own fruit garden.

Can every farmer have these luxuries? Certainly. The same kind of thought, skill and labor which must be given to general grain farming will produce an abundance of luscious fruit. Use the same judgment in selecting plants and cultivating apples and small fruits as you do in choosing corn, wheat and grasses. Take care to select those varieties adapted to your soil and climate. There are a great number of varieties of all classes of fruit from which to choose. Be on time, thoroughly prepare the soil, plant the trees carefully and give them intelligent culture. Don't neglect the orchard for other farm crops, but throughout the whole season give it attention. Do as I have recommended and your fruit plantation will give you more in actual value and ten times greater satisfaction than any other equal amount of land on the farm.

FOR FENCING. THE FAIR ATHLETE.

If for athletics you wish to go in this chic costume will help you win. It is of blue serge, the trousers slightly full and the blouse straight and closed in the center. The belt may be of the serge or of white leather.

A stylish outfit suit, you know. Would help your social row to hoe.

It is an ideal design. Have it built of light tan vicogne. The corselet skirt is ornamented with pockets and strap folds. The blouse is made of red and tan wool.

AN OUTING SUIT. FOR BALL AND RACQUET.

Then when with ball and racquet gay, You while the summer hours away,

Wear this gown of gray alpaca. The skirt has two bias folds of the gray and one of white. The jacket has white revers and white cuffs. Tan sailor with white ribbons.

A Bride's Sensible Trousseau.

Isabel A. Mallon writes of "A Bride's Moderate Trousseau," in the August Ladies' Home Journal. "The girl who has a fortune at her command needs no suggestions," she says, "but the girl who has to think out the wisdom of every dollar spent on her trousseau is the one who asks for advice. Taking it for granted, then, that you will live a more or less social life, having your day at home and visiting your friends, and going occasionally to hear good music, you can decide exactly what you will need. First of all, freshen all the gowns you possess, then you know their possibilities; then I would advise one handsome silk dress, combined, perhaps, with velvet, and having, to go with it, two bodices—one for wear when you are visiting, the other to be used when rather more elaborate dress is required. Have one simple, but smart-looking, wool dress for street wear; if required, you might better omit your visiting costume than this black skirt, either of moire, silk or satin, will be useful, since with it there can be worn any number of elaborate bodices. Then you will want, also, a comfortable wrapper, to wear in no place except in your own room; two pretty, well-fitting, house dresses; a coat suited to the season; a wrap that is a little more elaborate, if you can afford it; but do not make the mistake, so often made, of buying clothes that are not suited to your position in life, or what is equally as bad, of buying such an elaborate wardrobe that it will go out of fashion."

Pretty Gown for Bridesmaids.

Fashion demands that bridesmaids should be dressed in some of the faint tints, and also in white in honor of the bride. Any fabric, more or less light, of course, out of which a picturesque costume can be designed, is counted good form. A toilette which might be worn when there are several bridesmaids has a foundation of pale green China silk; over that is a plisse skirt and bodice of coarse fish-net, which has baby ribbon of green velvet run through the meshes diagonally. The yoke, which is full, is of white chiffon, and, like the fish-net, is over the green silk. The sleeves, full and finished with pretty frills, have ruffles of chiffon over the shoulders. At the top of the blouse portion of the bodice is a puckered heading of the chiffon, each little row of puckers being finished with a narrow velvet ribbon. The picturesque hat is of fine white Leghorn—Isabella A. Mallon, in August Ladies' Home Journal.

Life's Little Rumples.

"Made is either awfully careless, or she is engaged."

"What do you mean?"

"Why, she says she can't wear a shirt waist but one day."

the cucumbers, ejecting those that have softened. Soak the firm ones two days in fresh water, changing it once or twice.

To green the pickles line your process-kettle with grape leaves; arrange the pickles in layers, scattering a pinch of powdered alum over each. A heaping teaspoonful of alum will be sufficient for a large kettle. Cover the pickles with cold water, spread a triple thickness of grape leaves over them, cover, and steam over a slow fire for six hours. The water must not boil. By this time the pickles should be well greened; then throw into very cold water. While they are turning firm and crisp, in this put a cup of sugar, three dozen whole cloves, three dozen pepper kernels, eighteen allspice berries and twelve blades of mace into four quarts of vinegar and boil five minutes. Drain the pickles, put into cans or jars, pour the scalding vinegar over them and cover. Keep in the cellar. They will do to use in two months. String beans may be pickled in this way.

For a sliced cucumber pickle, which is a novelty in many families, slice two dozen good-sized cucumbers, put in an agate kettle with vinegar to cover and boil an hour. Let them stand while you prepare a pickle made as follows: One cup sugar; one teaspoonful, each, of mace, allspice and cloves; one tablespoonful, each, of horseradish, cinnamon, ginger, celery seed, black pepper and turmeric, half a teaspoonful of cayenne. Put these into a gallon of cider vinegar, add the sliced cucumbers, simmer gently for two hours, then put into jars.

Cauliflower makes an excellent pickle. Cut a firm head into small clusters and boil three or four minutes in scalding brine. Drain them, put into a jar and cover with cold vinegar, let stand two days, turn this off and then cover with a spiced vinegar prepared by this formula: One gallon vinegar; one cup sugar; one tablespoonful, each, of celery seed, coriander seed, mustard seed and whole white pepper, sliced. Boil five minutes and pour over the cauliflower.

For English chow-chow is prepared by this rule: Cut one cauliflower into clusters, peel half a pint of small onions, slice six green tomatoes, and string half a pint of string beans, add a pint of small cucumbers, sliced, and four small red peppers. Arrange the vegetables in layers with salt in a large stone jar, using plenty of salt. Pour on cold water enough to cover and put a weighted plate over them to keep them under the brine. Let stand three days, drain off the brine, wash off the pickles with cold water and let them stand twenty-four hours in fresh water. Spice a gallon of vinegar as follows: One teaspoonful each of whole black pepper, celery seed, white mustard seed, horseradish, mace and whole cloves; two teaspoonfuls of turmeric, one and a half cups of sugar (brown); three tablespoonfuls of ground mustard. Bring to a boil, drop in the pickle, cook five minutes, skim out into jars, and cover with the scalding vinegar. Let stand forty-eight hours. Drain off the vinegar, put on to heat again and add a tablespoonful of curry powder. When the vinegar boils pour it on the pickles again and when cold put them into small jars or bottles and seal. Ready for use in two or three weeks.

Blackberry Flavoring.

How many housekeepers have ever used blackberries as a flavoring—not by the direct use of the fresh fruit, but by means of an extract that can be kept the year round? Probably there are comparatively few who know what palatable flavoring can be accomplished with extract of blackberries. This extract can easily be prepared by the veriest novice who will closely adhere to the following directions: Weigh out exactly one pound of fruit, and place in a preserve jar. Care must be taken that it is ripe, juicy and of the best flavor. Over this mass pour six ounces of 95 per cent alcohol. Now seal the jar, as in preserving. Let the jar stand two days, or, better still, three. Shake well three or four times each day. On the second or third day unseal the jar, and throw the contents into a muslin strainer. Strain carefully until all the fluid has passed through. Next, gradually pass water through the strainer, letting it trickle through the fruit pulp, until an exact pint of extract in all has been obtained. If these directions are implicitly followed, failure is impossible. The extract, if kept tightly stoppered, will remain good the year round. Take pains to see that none of the fine seed of this fruit gets through the strainer. Owing to the presence of alcohol it is well to recollect that this extract, as well as all others, is to be bottled and stoppered as quickly as possible after making. Is the flavor of elderberries pleasing to a family palate? If so, a very strong extract may be made if the elderberries used are of the best by following the same proportions given in the preceding recipe.

STANDARD VARIETIES.

There Are 87 Standard Breeds of Fowls in This and Other Countries

1. American Class—Barred, Buff, Pouter, Banded and White Plymouth Rocks; Silver, Golden, White, Buff and Black Wyandottes; Black, Mottled and White Javas; American Dominiques and Jersey Blues.
2. Asiatic Class—Light and Dark Brahmas; Buff, Partridge, White and Black Cochins; Black and White Langshans.
3. Mediterranean Class—Brown, Rose Comb Brown, White, Rose Comb White, Black, Dominique; Buff and Silver Duckwing, Leghorns; Black and White Minorcas; Andalusians and Black Spanish.
4. Polish Class—White Crested Black, Golden, Silver, White, Bearded Golden, Bearded Silver, Bearded White and Buff Laced.
5. Hamburg Class—Golden Spangled, Silver Spangled, Golden Penciled, Silver Penciled, White and Black Hamburgs; Roups, Silver and Golden Comps.
6. French Class—Houdans, Crevecoeurs and LaFleche.
7. English Class—White, Silver Gray and Colored Dorkings.
8. Game and Game Bantam Class—Black-breasted Red, Brown Red, Golden Duckwing, Silver Duckwing, Red Pile, White, Black and Birchen Games, and some varieties for Game Bantams; Cornish and White Indian Games; Malays and Black Sumatra Games.
9. Bantam Class (other than game)—Green and Silver Seabrights; White and Black Rose Comb, Booted White, Buff, Partridge, White and Black Cuckoo; Black Tailed White and Black Japanese; White Crested and White Polish.
10. Miscellaneous Class—Russians, Sikies, Sultans, Frizzles and Rumples. The above ten classes may be subdivided into four general classes as follows:
 1. The general purpose breeds—the American class.
 2. The meat or table breeds—the Asiatic class.
 3. The egg breeds—the Mediterranean class.
 4. The ornamental breeds—the Polish, exhibition games, miscellaneous and bantam class.

Egg-Eating Hens.

The plan portrayed below can be made by anyone handy with tools, and the cost will be but little. After making

GRAMPA'S FARM.

Oh, you don't know the fun on grampa's farm.
For grampa says, "Let 'em; it ain't no harm."
An' Cousin Bob starts us an' cries, "Here goes!"
An' mamma, she only just says, "Such clothes!"

We've a Crusoe's Island an' robber's cave,
An' Tower of London, an'—don't you know,
When one of us wants to let on he's brave
He crawls under the sawmill, scared an' slow.

Oh, you don't know half the fun out there,
For grampa he never tells us "Take care!"
An' Cousin Bob laughs and says to "Ca-rouse!"
An' mamma, you see, is off in the house.

We fish in the brooks an' play in the sands,
An' try to catch tadpoles out of the springs;
We hide in the bushes like Ingen bands,
An' fight with the hornets, and get their stings.

Oh, there's no end of fun on grampa's place,
For grampa he says, "Now scoot on a race!"
An' Cousin Bob grins an' says, "There she blows!"
An' mamma, she only just says, "Such clothes!"

—American Agriculturist.

ORCHARD AND GARDEN.

Paragraphed Wisdom For Those Who Own Either or Both.

Young orchards often need additional fertility.

There is little danger of injuring an orchard by manuring.

In pruning cut out all weak and crowded branches.

All pruning cuts made at this time should be covered with oil or wax.

Starvation and neglect are the great causes of unfruitfulness with fruits.

Too large and too thick heads on the fruit trees should always be avoided.

Tobacco water will destroy worms and bugs on rose bushes. Spray it on.

If the fruit tree is heavily laden with fruit, thin it out before it breaks the tree down.

Keep a good lookout for tent caterpillars during the summer.

ROAMING ROMANYS.

INTERESTING INFORMATION ABOUT THE GYPSY RACE.

Many Thousands of Them in This Country—Good Horse Traders, Loyal Friends and the Pawnbroker's Best Patrons.

Who was your mother? who your father? Answer me in the Romany tongue, And I will answer thee.
—Oldest known Gypsy Folk song.

"The gypsy race shows no sign of extinction. The Romanys are as strong and as numerous to-day as they have ever been."

Thus spoke Paul Kester, ethnologist student of the lives, habits and language of gypsies. Mr. Kester is one of the greatest living authorities upon the American Romany. In his play "Zamar," one of the late Alexander Salvini's successes, he dealt broadly with his favorite subject.

"The gypsies," continued Mr. Kester, "came originally from Hindustan. The migration of the race occurred during the thirteenth and fourteenth centuries. The sovereign, 'Egyptian,' which they assumed, was, it is supposed, owing to their temporary sojourn in Egypt. The name Romany, ethnologists derive from the Hindu rom, a man. Armed with protesting letters from one or more of the Popes, they appeared in Germany, and thereafter swarmed over Europe. I cannot say when they first came to America, but certain it is that they were not long after the first white colonists. Spain sent her Zineali to Mexico, while from France and England gypsy families crossed the Atlantic in pursuance of their roaming instincts.

"There are many thousands of them in the United States, and they permeate all branches of society. I know of an eminent and respected Episcopal clergyman in Boston who has Romany blood in his veins. Once a year the old man, deriding fever comes over this good man, and then, hey presto! the pulpit is temporarily abandoned and he follows the patrin trail, or lounges contentedly among his kindred in the shade of the caravan tent. In many of our cities there are wealthy men and women, millionaires and so-called 'society people,' who are Romany-chals (gypsy men) or Romany-chis (gypsy girls), and who can not resist following the patrin when summer time comes round.

"But, of course, the great majority of the race live in their caravans all the year round, telling fortunes and trading in horses for a living—going south with the approach of winter and returning northward when summer is at hand. A generation or two ago polygamy was practiced among them in isolated cases; but to-day it exists no longer. An American gypsy has only one wife, and a very good husband he generally makes her. He is an excellent father, too. In all my long experience I have never seen a Romany father beat his offspring.

"Since the death of Matilda Stanley of Dayton, O., a few years ago, the American gypsies have had no generally recognized queen. This Matilda succeeded her aunt of the same name, Matilda Stanley I, whose great funeral and the vast horde of gypsies that attended it will still be remembered. The Irish-American and German-American gypsies have rulers of their own. There are 750 families of German-American Romanys, and their queen is Sophia Freyer, a Romany-chi of nearly 80 years. For many years old John Gorman was king of the Irish-American Romany. He was succeeded by his wife, Queen Bridget, who in turn gave place to her son, Bartley Gorman, the present king. King John Gorman and Queen Bridget came to New York from Ireland in the forties, bringing with them their wagons. Since then they have reamed the country over and multiplied greatly. Their chief vocation is horse trading. Har. Palmer in his 'Gypsy of San Francisco,' who claim of to have succeeded Matilda Stanley II, as sovereign of all the Romanys in America, died in 1894. His giant form and great wealth made him a familiar personage in California.

"All the gypsy families have two names—i.e., their Romany patronymic and its equivalent in the language of their adopted country. Here, as in England, the principal families are the Lees, Stanleys, Hernes, Lovels, Grays, Coopers, Smiths, Whartons, Canbills, Bucks, Lants and Costellos. The Romany first seven of these families are known respectively as Pirrums, or Lees; Bar-mesero, or stone people; Rosarmesero, or duck people; Gumbles, or box makers; Grays, or horse people; Vard-mesero, or wheelwrights, and Petulus, graces, or horse-shoers. It will be seen that in translating their Romany names they generally attempt to play upon

is that it is entirely needless. There is no reason in the world why every woman in the world should not be strong and healthful and capable of fulfilling her whole duty as a wife and mother. Many women go on month after month, and year after year, becoming weaker and weaker, because of a very natural hesitancy they feel in consulting a physician. They hesitate that if they go to a doctor for treatment, the first thing he will insist on will be "examination" and "local treatment." This must of course be distasteful to every modest woman. They are generally as unnecessary as they are abhorrent. Dr. Pierce's Favorite Prescription cures positively, perfectly, permanently, all varieties of "female weakness" and disease. It is designed to do this one thing, and it does it. It is the only medicine now before the public for woman's peculiar ailments, adapted to her delicate organization by a regularly graduated physician—an experienced and skilled specialist in these maladies. It cannot do harm in any condition of the system. Its sales exceed the combined sales of all other medicines for women.

Every woman will be healthier and happier for following the friendly, practical counsel contained in Dr. Pierce's great universal doctor book: 'The People's Common Sense Medical Adviser.' It is the most comprehensive medical work in one volume in the English language. It contains 1000 pages, fully illustrated. 68,000 copies have been sold at \$1.50 each bound in cloth. The profits are now used in printing half-a-million free copies bound in strong manilla paper covers. To get one you have only to send a one-cent stamp (to pay cost of customs and mailing only) to World's Dispensary Medical Association, 661 Main St., Buffalo, N. Y. Send promptly before a given away if you want one. They are going off rapidly.

the bauls, and thereby obtaining fresh perk. English gypsies smack their lips over the memories of toasted asch-witchi, or hedgehog. The gypsy way to cook a fowl is to do it up, feathers and all, in clay, and bake it in the heart of the fire for a little more than thirty minutes. The clay is then removed, taking with it the feathers; the fowl is cleaned and the feast is ready. Yorkshire pudding, apple dumplings and other English dishes are great favorites with the gypsies.

"In so far as I know him (and I may safely say that I know him well) the American gypsy is one of nature's gentleman-courteous, considerate and loyal, sacrificing friend to his friends. The average Gorgio, of course, the Romany dislikes and distrusts; but win the gypsies' affection, and you keep it always. The vagrant tendencies of the race can never be crushed out. They are in the blood, bred in the bone, of the true Romany. So long as the pure gypsy strain exists, chial and chi will follow the patrin trail, tell fortunes, trade horses, woo the Gorgio's gold, and sleep with the broad arch of heaven for their canopy."—New York Sun.

KNOW HIM BY HIS NOSE.

This Feature Proclaims the Character of Man.

1. Do not marry a man whose nose shows any natural deformity or twisting; there will invariably be some corresponding flaw in his moral nature.
2. Do not marry a man whose nose comes out of the big forehead in almost a straight line, the type of nose often seen in statues following Greek models. Such a nose is invariably accompanied by extreme willfulness, selfishness and sometimes cruelty. Nero had such a nose and so did Mary Queen of Scots.
3. Do not marry a man with a sharp pointed nose, he will have a sharp, uncomfortable character. He will be hard to please; there will be acidity in his nature.
4. If a man tells you he is an artist or writer and has a nose that is not red and at the tip, do not believe him. There is great value in the aesthetic finish of the tip of the nose in men of these two classes.
5. If you want a husband who will make his way in the world and probably gain power or money, take one whose nose is broad ridged and prominent and bears a moderate hump in its upper half. If he is a wide-headed man as well, he will insure you your wish. And he will be a brave fellow physically as well.
6. If you want a husband who will be

THE EGG-EATING HEN FOILED.

the frame as shown at A, take a strong, close piece of burlap, cut somewhat larger than the frame, and set a ring in the center of the piece large enough for an egg to pass through easily. Tuck this on the upper edge of the frame A, allowing it to sag five or six inches in the center, as at B. To complete the nest and make it more attractive and natural for the hens, wisps of hay may be twisted and sewed on the inside. The frame should be made to fit tightly in the nest here before used, so that it will not have to be fastened. The egg will drop through the hole and roll to one side of the nest below. The eggs may be gathered by simply lifting up the front side of the frame.

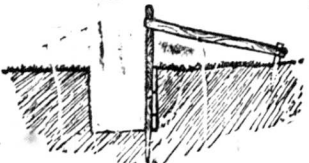

Plastering a Silo.

We (Hoard's Dairyman) are sometimes asked whether it would not be a good plan to lath and plaster (with cement) the sides of a silo. Having never tried such an experiment, we are unable to answer from personal observation, but a writer in The Walton (N.Y.) Reporter says:

Last year, Leroy Evans, of Franklin, built a silo in the new barn on his father's farm, which he has been renting for a few years. The silo is 12 feet square, 27 feet deep and holds 75 tons. Mr. Evans and his hired man did most of the work. It was sided about 3 feet apart all the way up on all sides. On three sides, it was double boarded, and, on one side, one thickness of plank was used instead of boards. All the way up on the inside were nailed half-inch strips, two inches wide and about one-half inch apart. The bottom and sides were plastered with cement. Mr. Evans says it cost only about \$10 besides his own work and the lumber. He thinks this is the best way to construct a silo, because no air can get to the ensilage, and no moisture from it can injure the buildings. He is building another one this season on the farm which he and his sister own. In the same way, only a little larger, and uses all plank in place of boards.

Ditching in Insecure Soil.

It is occasionally necessary to cut a trench through soil that will not "stand up" in the wall of the ditch. Sandy soil is of this nature. To keep the ditch open until a pipe can be laid, the plan shown in the accompanying diagram can

TO SECURE A DITCH.

be used to advantage. A stake is driven at one side of the proposed trench and is anchored from its upper end as shown in the sketch. As the trench is deepened, a board is slipped down behind the stake, another stake is secured in the same way. As the trench is deepened, the board is pressed down, and another added above it, the stakes also being driven down and so on till the required depth is reached. The same plan will probably have to be used on both sides.

Scott's Emulsion of Cod-liver Oil with Hypophosphites brings back the ruddy glow of life to pale cheeks, the lips become red, the ears lose their transparency, the step is quick and elastic, work is no longer a burden, exercise is not followed by exhaustion; and it does this because it furnishes the body with a needed food and changes diseased action to healthy. With a better circulation and improved nutrition, the rest follow.

For sale at 50 cents and \$1.00 by all druggists.
SCOTT & BOWNE, Belleville, Ont.

pulling during the summer.

To secure the best grapes more or less thinning is necessary.

Pulling off vine leaves to let in sun and air is an injury to the vine.

The more healthy leaves a plant has the better the fruit will color.

Weeds and suckers should be kept down between the rows of raspberries and blackberries.

Fruit trees that have been grafted need to be looked after to see that the stock does not make shoots.

You can avoid fruit trees and plants only at the risk of getting reduced crops of inferior fruit.

Protection from too much sun is always an advantage with currants, gooseberries and raspberries.

When the peach tree is making a spindling growth of twigs and limbs, it is a good indication that the soil lacks potash.

With a young orchard at this time it will be a good plan to stop cultivation and mulch carefully, leaving the soil in good till.

Three or four strong canes to one hill of raspberries are better than a dozen weak, spindling ones. Thin out and stop unnecessary growth.

Surround the home with fruit and flowers. It will help in shaping and refining the minds of the children.

On the farm fruit should be a necessity rather than a luxury, as it is often considered in towns. More fruit and less bread will give better health.

Thrifter and stockier raspberry and blackberry plants will be secured if the growing plants are kept pinched back during the summer.

If strawberry plants are to be set out in August, the better plan is to plow the ground now, at the first opportunity, before it gets too hard.

When the largest profit is made from fruit, the best for market, special varieties are grown for special markets. Study your market before deciding on varieties.

Among the Poultry.

Geese and ducks should be full feathered before killing.

If eggs are stored in a damp place they will soon taste musty.

Buckwheat is a first-class egg producer.

Keeping fowls on a hard floor will frequently cause swollen feet and legs.

At night before they go to roost is a good time to give the fowls a little extra food.

Late hatched turkeys can be given a start earlier than the early hatched. When there is no check in growth the chickens will get over their feathering easily.

A rapid growth of bone, flesh and feathers demands frequent feeding.

If there are any hens to be sold this fall a good time to sell them is when they quit laying.

Dampness and lice are the great dangers among all kinds of young poultry.

A little flaxseed meal in their food will help the old fowls to pass through their moult quickly.

One hen that eats eggs will soon spoil a whole flock if allowed to run at large.

The flesh of the guinea is dark, but it has a delicacy of flavor that approaches that of wild game.

The best plan is to train the young poultry to roost in the poultry house from the start.

If young ducks are allowed access to a pond too early they are apt to have cramp in the legs.

The laying of unusually large eggs is pretty good indication that the hens are too fat.

When the hens stop laying a change of food will often start them to laying again.

Give the hens all possible freedom and there will be less trouble with soft-shell eggs, as they will secure the lime they need.

Early, well-developed pullets make good winter layers. Select them out before sending the fowls to market.

If the hens are too fat, change the grain ration and give a small quantity of whole oats daily.

One of the best times to commence feeding the fowls to fatten is just before they are fully matured.

Ducks will thrive best and fatten fastest on soft feed—one part cornmeal, one part bran and a little meat is a good fattening ration.

When boiled until soft makes one of the best feeds to give young poultry. It is easy to prepare, clean and healthy.

Pigs on the Dairy Farm.

Dairymen who keep swine, and they always should, unless all the milk is sold, should mix grain of some kind with the skim milk or whey that goes to the pigs. Corn meal and skim milk in proper proportions cannot be excelled as pig feed. It is imprudent for a dairyman to grow hogs on the waste from the dairy without any grain; yet the only way to prove this to some men would be by the use of the scales, in tests with mixed rations.

words, when they could not find the exact equivalents. In the same way, the gypsies have Romyany names for most of the big cities in England and this country. They are quite opposite, too, as may be judged by the following short list, picked up around camp fires and caravans: Kanlo-Gay, or Black-town, Pittsburgh; Bor-Gay, or Big-town, New York; Lawlor-Gay, or Beer-town, Milwaukee and St. Louis; Pannom-nge, or White city, Philadelphia, or Red, I suppose, from its famous white doorsteps; Purren-Gay, or Old-town, Boston; Siz-mengo, or On's city, Chicago; Pulze-Gay, or Bridge-town, Brooklyn; Beluni-Gay, or Queen city, Washington, and Matchenesko-Gay, or Fish-town, applied to Gloucester, Mass., and other seacoast towns.

The nomadic gypsy bands are not so large as in less civilized times, when the Romyany were forced to travel in large numbers for self-protection. From twelve to twenty persons make up the average caravan today, although in some cases the bands number fifty or sixty. A very large band is the famous one of which old Clevelode Lovel is the chief. Every year Lovel's band comes north and camps between Newark and Elizabeth, N.J., in the woods by the Boulevard. These Lovels are over sixty in number. At one time they were a part of having abdicated Charles Ross, but the fair-haired boy found in their camp and supposed to be little Ross was proved a nephew of old Clevelode, and is now their apparent chief. The chief, Stanley, and his family yearly encamp near Craw Hill, Kings County, N.Y., in the suburbs of New York. The gypsies ruled by Mrs. Caroline Stanley meet annually while branches of the Stanley family of Ohio encamp near Dayton, Cincinnati, and Cleveland.

The patrin is the code of signs by which gypsies tell each other the road to be followed. The word comes from the Sanscrit patra, a leaf; and the commonest form of patrin is the scattering of little tufts of grass or tiny bundles of leaves along the route pursued. Straw, sticks, pebbles and crosses in the earth are also used. The form of patrin for night guidance is the placing of a small forked stick upward in the ground, with a smaller stick pointed in the light to show the direction. Nowadays, however, the gypsies are getting so unromantic that they do a great deal of telegraphic changes in the various cities are liveries, stables and pawnbrokers' shops. The first fact is explicable when one recalls the horse trading of the Romyany; but the second calls for explanation. Gypsies are the pawnbrokers' best customers. They buy lavishly all sorts of gold, silver and amber and cowrie ornaments, and nearly all their dealing is done with the pawnshops. The gypsy woman has an oriental taste in jewelry, and every Romyany-chi possesses a box full of trinkets, especially in silver, amber, and tin, and herance from Hindu ancestors' cowrie beads. The pawnbrokers keep in touch with the various caravans, and at the sign of the three golden balls the Romyany means the whereabouts of relatives and friends.

"It is difficult indeed to win the gypsy's confidence. He is distrustful of the Gorgio, or Gentile, by whom he has been persecuted, whom in turn he has hated and preyed upon for ages. It took the four long years to break the ice with a single Romyany family; but, once broken, the rest was easy. Very soon I had a good colloquial knowledge of Romyany. My friendship with the one family, and my acquaintance with the mystic patrin code, proved adequate introduction to the gypsies everywhere.

The American gypsy, as a rule, has no real religion. Frequently he ostensibly follows some faith, but he does it with his tongue in his cheek. Their word for God is Deva or Devel, from the Sanscrit deva, a deity; but the word has to them little or no significance. Broadly speaking, they are pagans. Yet superstition exists among them; though they affect to sneer at the spells and incantations with which their tricksters deceive the Gorgios.

"Many curious customs prevail among our Romyany. For instance it is common among the Colorado and California gypsy women, while secretly conniving at the marriage of their daughters, apparently to oppose the suitor's advances bitterly. This necessitates an elopement; after which the young pair, having shown their Romyany spirit, are welcomed back to the maternal tent pole. Their cooking and eating habits are often odd enough. For pork they have a great fondness; and in old times they were accustomed when passing a farmhouse to 'drab the baulo,' (poison the pig) and beg the carcass from the farmer. The poison known as 'drab' is one of the Romyany secrets. It is a curious drug which affects only the animal's brain, leaving the rest of the body unpoisoned. Many old Romyany-chis have admitted to me that they still occasionally yield to the temptation of 'drabbing

to. If you want a husband who will be always hopeful and buoyant, take one with a tip-tilted nose, but not too short, for if it be that you will find him over impulsive.

7. And once more I say, not marry a man with a long, drooping nose. Besides being gloomy and secretive, he will probably be critical and fault finding.

8. If you want a husband in whose heart you will hold undisputed sway, do not marry a man with these three signs fatal to faithfulness. A narrow eye, almond-shaped or with straight edge under lid; an upper lip full at the center and red and moist; a palm which shows on the full, fleshy part under the thumb many well-cut lines crossing at right angles.

Wasn't Sure.

While a Scottish regiment was on the march in India from one station to another the doctor, as is usual at certain camps on the line of march, paraded the men for inspection, and, on going his rounds, made one man a prisoner for having dirt-begrimed knees.

The next morning the officer ordered him to headquarters, and asked him the reason why he didn't wash his knees.

"Well, sir," replied Scottie, "there was a dizen or mair o' us in a line, and I ken this much that I washed a pair o' knees, but whether they were mine or no I canna awair."

Sending a Child by Mail.

A novel parcel for delivery by express post was handed in at the Birmingham postoffice. A working man, who had been out of town with his three-year-old child, arrived at Birmingham in time to reach his place of business, but not in sufficient time to take the child home. He therefore walked into the nearest postoffice and tendered the youngster as an express parcel. The authorities, under the rule regulating the delivery of live animals, accepted the child, and duly delivered it at the charge of ninepence.

Morphine in France.

The injection of morphine is a habit this is, unfortunately, on the increase in France, especially among the middle classes. On statistics furnished by the pharmacists it is estimated that there are in Paris at least 50,000 victims of the morphine habit, the majority of whom are women.

For Disagreeable Odors.

Disagreeable odors arising from decaying vegetable matter are dangerous to tolerate at any period of the year, but most so during the height of warm weather. They can be destroyed at once by pouring over the heap two pailfuls of water, to one of which has been added one pint of the liquor of chloride of zinc, and to the other one pound of chloride of lime. Remember, this is something not to neglect. Delays here are especially dangerous.

To Remove Paint From Glass.

To remove paint from window glass take some strong vinegar and heat it very hot. Wet a cloth in the hot liquid and wash the glass with it and the paint will come off quite readily. A strong solution of oxalic acid will also remove dry paint.

How to Clear Fly Specks Away.

Are the window-panes and looking-glasses fly-specked? Then use a little alcohol on them. It does wonders in cleaning and brightening glass of any description.

To Keep Flies at a Distance.

To keep flies away from gilt frames, boil four or five onions in a pint of water and apply with a soft brush. Mr. Fly will then give them a wide berth.

Every No. 1

Woman

Should Enjoy Life.

How many do?

Many are miserable, weak and stinky, and suffer untold miseries peculiar to their sex.

IT IS WRONG. The cause of most all these ills is easily reached, and effectively removed by the great woman's medicine.

COMPOUND

MILES' (Can.) VEGETABLE COMPOUND

and Miles' Sensitive Wash.

Prices 75c. and 50c. They impart vitality and energy, and make the life of the "Weak" a life worth living. For sale by all Druggists.

Explanatory pamphlet, "Woman's Triumph," sent free on application.

ISSUER OF MARRIAGE LICENSES.
Express Office, Napanee.
Strictly Private and Confidential.

The Napanee Express

NAPANEE, FRIDAY, SEPT. 10 1897

All local reading notices or notices announcing entertainments at which a fee is charged for admission, will be charged 50 per line for each insertion, if in ordinary type. In black type the price will be 10c per line each insertion.

Close's Mills grinds Tuesdays and Thursdays forenoons. Jas. A. Close.

20c. blouse sets for 10c. from now on at F. Chinneck's Jewelry Store.

"Brook" Leary is in a fair way of securing pension from the American Government.

D L C took second place and Statutum third in the 2.29 trot at Gananoque last week.

There are eleven prisoners confined in the Napanee gaol at present, eight males and three females.

THE BEST COUGH CURE is Haggard's Pectoral Balsam. It heals the lungs and cures Coughs and Colds.

Coming.

Dr. JENN, (formerly of New York), Eye Specialist, and inventor of the famous Recherche Optometer, the latest and most improved instrument known to modern science for pointing out every defect and disease of the eye and sight. Cures granulation and inflammation of the lids, head-aches, and straightens cross-eye, &c., without medicine or operation. A cure guaranteed in every case or money refunded. Consultation and examination free. Will be at Deslor's Drug Store, Sept. 15th only.

Standing of the Scorchers.

Last week's issue of "Cycling" announces that Angus McLeod is leading the professional bicyclists on their pool-board. McLeod has won 17 firsts, 7 seconds and 1 third place—83 points; Davidson has 70 points. R. E. Axton, Brantford, is first on the amateur list. He has won 24 firsts, 7 seconds, and 5 thirds, with 115 points to his credit. Couserat, of Montreal, is second, with 66 points. George Smith, Kingston, has got on the "board", he has 38 points, and his name appears half way up the list. Smith has 8 firsts, 2 seconds and 2 thirds.

Make The Most of Yourself.

It is the duty of every man to make the most of himself. Whatever his capacities may be, he is sure to find some place where he can be useful to himself and to others. But he cannot reach his highest usefulness without pure blood. The blood circulates to every organ and tissue and when it is pure, rich and healthy it carries health to the entire system, but if it is impure it scatters disease wherever it flows. Hood's Sarsaparilla is the one true blood purifier. It cures salt rheum, scrofula, catarrh, dyspepsia and rheumatism because these diseases have their origin in the blood.

An Interesting Struggle.

While out cruising on the bay in the yacht Petrel on Monday last Mr. Rube Shipman succeeded in landing a forty pound maskinonge. It will take rank as one of the largest fish caught in the bay this year and Mr. Shipman will remember his struggle with the monster for sometime to come. When Mr. Shipman found that he had a large fish on the line he clapped on all sail and gave his mascooship a pretty swift time of it for a while. When the fish was pretty well tuckered out Mr. Shipman decided to land him in the dingy which they were trailing behind the boat. Without shortening sail Rube climbed out into the dingy and landed the masco, hand over hand. The fish had no more than struck the boat than it leaped back into the bay. Again it was drawn into the boat and this time it got clear of the hooks. Rube was fearful his prize would escape him and he dropped on it and then began an interesting struggle with the mastery. Rube emerged covered with scales but had the proud satisfaction of conquering one of the finest mascos of the season.

Labor Day at Deseronto.

The Labor Day demonstration at Deseronto was a pronounced success, and doubtless the largest crowd that ever congregated in Deseronto witnessed the programme of sports. The following bands were in attendance: 14th P.W.O.R., and Independent Fife and Drum Band, Kingston, Napanee Citizens Band, Yarker, Trenton, Picton, Marmora and Deseronto bands. At the park the combined bands, led by Prof. Denmark, played several fine selections, which were greatly appreciated. In the marching contest the Picton band captured the prize. Owing to a misunderstanding the Napanee band marched past the judges stand and did not counter march and march back again. This undoubtedly lost them the prize, as outside of the 14th they were undoubtedly the best band in attendance at the festival. The following is a summary of the sports in which J. P. Anderson looms up in good shape. Frank Lee, of Napanee, also made a good showing in the bicycle races, considering it was his first race, and the poor condition of the track.

Bicycle Race, one mile, novice—1 Norman Crowe, 2 J. P. Anderson, 3 Norman Robinson. Time 2.42.

Apple Race, 100 yards, amateur—1 Alex. Gaulin, 2 Bert, Rorke, 3 F. J. Sheppard.

Running, 100 yards, amateur—J. K. Oliver, 2 Alex. Gaulin, 3 Wm. Coughlin. Time 11 seconds.

Vaulting with pole, open—George Nolan 8 ft. 1 in., Charles Coleman 8 ft., W. P. Rogers 7 ft. 6 in.

Running, 400 yards, amateur—1 Alex. Gaulin, 2 Wm. Coughlin, 3 J. P. Anderson. Time 54 seconds.

Running high jump, open—Charles Coleman 5 ft 2 in., W. P. Rogers 5 ft in., Geo.

Warner Mill and Robinson street, hard, not out, or in cordwood, Trenton dry edgings and blocks. Reasonable rates. A call solicited. Wood delivered free to all parts of the town. S. J. HOWARD. Telephone 81.

Parisian Steam Laundry

Agency at E. Vanastine's Barber Shop, John st. Laundry will be called for and delivered to any part of the town at usual prices, strictly C. O. D. This is one of the largest and best equipped Steam Laundries in Canada. Laundry shipped once a week, on Wednesday, 8:20 p.m. and delivered Saturday morning. No chemicals used in the Laundry. All work guaranteed first class. Lists on application. tf.

Score Another for the Ontario Klondike.

A Hay Bay man came into town on fair day and disposed of some farm produce. With \$37 in his pocket he proceeded to "liquor" up and next morning he found himself laying under his buggy with 50 cents in his pocket. The robbers were very generous as they knew he would be dry in the morning.

Fall in Line.

Take your place in the procession going to Smith's to have their eyes examined by the expert optician. Taking chances with your eyesight is downright recklessness. Nearly all who suffer from headaches are guaranteed relief by wearing Smith's correctly fitted spectacles. Present neglect means greater eye troubles in old age. H. E. Smith is a graduate of the New York Optical College, and student of Dr. Knowles, New York City. He has had years of experience and will guarantee satisfaction to all. Office, SMITH'S JEWELLERY STORE.

Farm For Sale.

The undersigned offers for sale on easy terms that valuable property, known as the C. M. Switzer-farm, next to Robert N. Switzer's, part of lot number 12, in 6th concession Ernestown, 150 acres. This farm is situated in Switzerville, where there is a post office, church, school house, and a good cheese factory; seven miles from Napanee, four miles from Newburgh, and 20 miles from Kingston. For particulars apply to MRS. CHAS. KELLAR, Napanee, or to H. WARNER, Napanee.

Napanee, September 2nd, '97. 37d

Dr. Coutlee in Town.

Dr. Coutlee, the Reform Candidate in Addition for the Local House spent Monday and Tuesday in town calling on old acquaintances and forming new ones. Mr. Coutlee made a favorable impression here and is going into the campaign with an enthusiasm that is a happy augury of success. The doctor will make a thorough canvass of the riding which will be thoroughly organized. The doctor impresses one as a man who is fully conversant with the questions of the day and he will make it interesting for his opponent, who ever that may be.

A Pronounced Success.

The Flower Show, under the auspices of the Napanee Horticultural Society in the Curling Rink on Friday last afternoon and evening, was one of the most successful events of the season, and if one wished to institute comparisons between the show of last year and Friday's display it would demonstrate at once the great stride made by the society in one short year. The display of flowers was large, varied and beautiful and the arrangement of the plants reflects credit on the taste and good judgment of those in charge. The interior of the large rink was brilliantly illuminated with incandescent lights, while the outside rink was lighted with arc lights. The show was under the management of Mrs. W. H. Wilkinson, the indefatigable president of the society, ably assisted by the secretary, Mr. Jas. E. Herring, and Messrs. W. S. Herrington, Thos. Symington, Rev. McDonald, Mrs. A. McNeil, Mrs. R. G. Wright, Mrs. Robt. Mill, Mrs. (Sheriff) Hawley, Mrs. W. K. Prunty, Mrs. Burritt, Mrs. Herrington, Mrs. J. L. Boyes, Mrs. Nelson Wagar, Mrs. Geo. Lloyd, Mrs. Harmer, Miss Belle Pollard, Miss Ballantyne, Misses Harshaw, Missa Ward, Miss Templeton, Miss Bay McDonald, Mr. Cowan and others. The professional services of Messrs. Lloyd and Harmer were

on Monday evening a grand free entertainment under the auspices of the Sons of Temperance will be held in Brisco's opera house. The meeting is being looked forward to with great interest as Mr. A. D. Meeks, of Toronto, Grand Treasurer, Provincial D. D. W. P., will be present and deliver an address preparatory to the Dominion plebiscite campaign. Mr. Meeks is spoken of as an eloquent and forcible speaker. Messrs. Bowen E. Aylsworth, warden of the county, and W. W. Meacham, M. P. P. will also be present and deliver short addresses. An excellent programme of instrumental and vocal music is being prepared in which the following well-known talent will assist: Mrs. F. E. Vanluven, W. H. Perry, F. Vandewater, Napanee; F. L. Tooker, Yarker; F. D. Moore, E. D. Shores, Newburgh, and others. D. P. Henwood will give a number of piano selections and also act as accompanist. Doors open at 7.30 p.m., programme at 8. Everybody welcome.

The Bank Robbery.

There has been no new developments in the Dominion Bank robbery, although it is difficult to say what a day or an hour may bring forth. Detectives Hodgins and Greer, of Toronto, together with the bank detective have been in town all week working on the case. Two Pinkerton detectives are also said to be in this vicinity. The detectives are working on the presumption that the burglar was acquainted with the combination before he entered the bank. A great many rumors are floating around but it would answer no good purpose to retail them. The Toronto World of Sept. 4th, reproduced a post card, post marked Strathroy, to which it affects to attach some importance. The epistle is as follows:—"The editor, The World, Toronto World, Toronto. What was you paid to publish that rot about the Napanee bank robbery—who gave the robbers the keys of the treasury to take out the cash." "The Toronto World is rotten to write such stuff. Humbug." There doesn't appear to be anything in this. The following notice has been sent out to the banks and their branches by the Dominion Bank:

"THE DOMINION BANK."

The numbers of our unsigned ten dollar notes, which were stolen from our Napanee agency, run from "No. 46001 to 47000—SERIES A—Dated 2nd January, 1888 and were not countersigned by E. H. Baines as pro-cashier.

If any of these bills are presented at your office, you are kindly requested to trace them back as far as possible and communicate at once with this office.—R. D. Gamble, general manager. "Toronto, Sept. 1st, 1897."

The question now arises will these stolen bills be redeemed by the bank. The bank may not be legally responsible and may repudiate them, providing Mr. Baines' signature is forged to the bills. It may pay the bank better to pay the bills when presented, rather than have the public fight shy of all their bills. The Brockville Times calls attention to the fact that about the year 1872 a somewhat similar case occurred in Montreal when the now defunct Consolidated bank had a number of unsigned circulation notes stolen and refused to pay them. The Dominion Bank may prefer to pay the stolen money rather than suffer the bad moral effect of such a course. The written signature on a bank bill varies so much that the ordinary business man and the general public have really no safeguard against a peculiar case like this. One of the burglars, for instance, might sign his own genuine signature on the stolen bills instead of that of Mr. Baines, and to the vast majority this would appear all right.

In the Bald Mountains.

To the uninitiated a trip through the Bald Mountains, with its beautiful chain of lakes, rivers and streams, is a revelation. The editor of this journal, accompanied by Messrs. Geo. Thompson and James Roblin, made the trip last week and all three laid in a fund of fish stories sufficient to last until the deer season opens. A trip through the Bald Mountains used to be considered "something of a chore" a few years ago when the rock road-bed was unadorned with sand and the corduroy was much in evidence. The liberal grants to colonization roads made by the Ontario Government has rendered the drive a pleasurable one. This year \$500 has been expended on the Clare River road to Cloyne and the work has been carefully and intelligently executed. There is excellent grazing land in the Bald Mountains and we had the

and cures Coughs and Colic.
Mr. Sidney Kitchen, conductor on the B. of Q. R. R. was married to Miss Annie Beaulieu, of Deseronto, at Napanee on Sept. 1st.
Ten dollars given to any one with defective sight I cannot remedy with glasses at Perry's drug store on Monday and Tuesday, Sept. 20th and 21st. 40-b

Hay forks, rope, pulleys, binding twine. Agents for plymouth the best in the world more feet to the pound better twine, and for that reason, cheaper. Sold only at Boyle & Son.

An English country squire who wished to make an entry at the agricultural exhibition, wrote thus to the secretary: "Please put me down on your list of cattle for a calf."

J. P. Whitney, M.P.P., will address a meeting in Napanee on Sept. 16th. Great preparations are being made by the local Conservatives to give their leader a royal welcome.

Last Tuesday was the annual fair day, and considerable trading was indulged in. The Royal Hotel yard was the scene of operations and trading horses was much in evidence.

You can start any time, and secure THE NAPANEE EXPRESS and The Weekly Globe, by paying \$1.25 for one year's subscription. Both papers mailed to your address. Why not start now? Remember 'tis fashionable to be a Grit now-a-days.

Go to R. Lawson's meat market for prime fresh beef, pork, veal, lamb and all kinds of salted meat. Home-made sausage and all kinds of poultry in season, fine sugar cured hams and English breakfast bacon, always on hand. Prices to suit the times. 22-f

An old and esteemed resident of Richmond crossed the Great Divide on Friday, in the person of Marshall Bidwell Wagar, aged 60 years, 7 months, and 20 days. The funeral took place from the residence of Thos. Anderson, jr., on Sunday to the western cemetery and was largely attended.

A special meeting of the town council will be held on Monday night to consider the applications for the position of chief of police. A large number of applications have been received and our civic daddies will have a decidedly interesting time making a selection. Several local men have applied.

John Conger, of the Brisco House, was before Police Magistrate Daly last week charged with three infractions of the License Act, viz., keeping a disorderly house, selling liquor to a minor, and keeping his bar open after hours. John acknowledged the "corn" and a minimum fine was imposed.

Hugh Hickey, aged 16 years, died under chloroform on the operation table at the Kingston General Hospital, on Saturday, while undergoing an operation for an eye affliction. Deceased was a brother of Mrs. James Chapman, of Napanee, and the remains were taken to Napanee on Tuesday for interment.

The Ontario statutes for 1899 in the amendment to the Municipal Act provide that all nominations at municipal elections shall be in writing. This will do away with a good deal of nonsense and fooling at such meetings. Often one elector will nominate another for fun or mischief, and the one so nominated will return the compliment to get even.

On Saturday night the police "swooped down" upon the residence of Mrs. Orvie Lynn, Belleville road, and "gathered in" three Deseronto youths, a fourth one making his escape. The lady in question is better known as "Duck" Lynn, and has been a conspicuous figure upon our streets for a number of years. The following wards, who were sheltering under the shadow of the "Duck's" wing, were found in the house: Hattie Smith, Ida May Storms, and Mary Carr, the latter being only about 15 years of age. On Monday all the "doves," with the exception of Ida May, were brought before the Police Magistrate and remanded to gaol until to-day. The boys are out on bail. The Storms girl has been keeping out of the way of the police, but will likely be on hand for the trial.

Eczema Relieved in a Day.
Dr. Agnew's Ointment will cure this disgusting skin disease without fail. It will also cure Barber's Itch, Tetters, Salt Rheum, and all skin eruptions. In from three to six nights it will cure Blind, Bleeding, and Itching Piles. One application brings comfort to the most irritating cases. 25 cents. Sold by A. W. Grange & Bro.

Boyle & Son.

A foot ball match between Newburgh and Deseronto resulted in a tie, no goals being scored. The sports committee, however, presented each team with a ball.

The Laying of the Corner Stone of the New St. Luke's Church.

Thursday was a red letter day in Camden East, the Corner Stone of the new St. Luke's Church being laid by the Hon. N. Clarke Wallace. At ten o'clock the Grangemen, Prentice Boys and Clergymen, headed by the Yarker Band, marched from the Orange Hall to the church site. The Rev. S. R. Serson conducted the service. Miss A. Sproule played the organ accompanied by Mr. M. Vanliven on the cornet and the congregation joined in singing the well known hymn, "The Church's one foundation." The pastor of the parish Rev. F. Deatly Woodcock read the memorial which together with the "Canadian Churchman" "Church Evangelist," "Napanee Beaver" "Kingston Whig" "NAPANEE EXPRESS," a set of jubilee stamps and some coins, were placed beneath the stone. The Corner Stone being laid, addresses were given by the Rector, the Hon. N. Clarke Wallace and the Rev. F. T. Dibb, the offertory was then taken up, which amounted to \$30.50, after which the benediction was pronounced and the doxology sung. The procession marched back to the Orange Hall and then dispersed. A most sumptuous dinner was served by the ladies of the congregation in Hinch's Hall, the people then adjourned to an adjacent field, where speeches were delivered by Uriah Wilson, Esq. M. P., Rev. T. R. Serson, John W. Bell, Esq. M. P., James Reid, Esq. M. P. P., Rev. W. G. Swayne and the Hon. N. Clarke Wallace, after which, a very exciting baseball match was played between Newburgh and Camden East. Newburgh won. The memorial placed beneath the stone is as follows.—In the name of the Father, and of the Son and of the Holy Ghost. Amen. On this second day of September, in the year of our Lord, one thousand eight hundred and ninety seven, being the Diamond Jubilee, the sixtieth year of the reign of our most illustrious Sovereign Lady Queen Victoria, the Right-Honorable the Earl of Aberdeen, being Governor General of Canada, and Sir George Kirkpatrick being Lieutenant Governor of the province of Ontario, this Corner Stone of the church dedicated in the name of St. Luke Evangelist and Martyr whereof Frank Darling of Toronto is the architect, William Saul of Camden East, the contractor for the masonry, David L. Brown of Deseronto, for the brick work, and Cyrus Edgar of Camden East for carpenter work, the most reverend, His Grace John Travers Lewis, Archbishop of Ontario, Bishop of the Diocese, the Rev. Francis Deatly Woodcock, rector of the parish, Robt. Jones and Thos Hamilton church wardens, Charles Riley, Lay Delegate, the building committee, Robert Quinn, George E. Hinch, Ashcroft McWilliams, Thos. Milsap, Peter Tompkins, James Robinson, Charles Riley, secretary, and Samuel Greenway, treasurer, was laid by the Honorable N. Clarke Wallace, (late controller of customs in Her Majesty's Canadian Government) in the hope that upon this stone may be erected a church, which shall be for the honor and glory of God, and by the blessing and guidance of the Holy Spirit continue to be (as its predecessor has been for sixty years) an instrument, powerful and conspicuous in shedding abroad the light of the Holy Gospel of the blessed Saviour. Amen. The old church was opened on the fourth of March, eighteen hundred and forty four. A beautiful trowel was presented to the Hon. N. Clarke Wallace by Charles Riley Esq., on behalf of the congregation. The trowel was purchased from Messrs. Chinneck & Son, Napanee. The gross proceeds of the day were about \$175.

Paris green, paint oil, white lead, window screening. New line pocket cutlery, cheap at Boyle & Son.

services of Messrs. Lloyd and Harmer were also of much assistance. The rink was handsomely decorated with bunting, flags, grasses, etc., the work of Messrs. A. E. Paul, W. T. Waller, Thos. Symington and Rev. McDonald. On entering the rink one was charmed with the panorama of beauty that met the view. Potted and out flowers abounded in vast profusion. To attempt an adequate description of the scene is beyond us. The centre piece of the decorations was a well gotten up Ferris wheel, designed and constructed by Mr. Jas. E. Herring, the decoration being the work of Mrs. Burrett, Mrs. W. K. Bruyn and Mr. W. J. Cowan. The wheel was eleven feet high, and the supports and frame work were decorated with grasses, flowers, bunting etc. The drum revolved and had eight little carriages filled with plants of all hues and colors, rare, exotic and otherwise. The cut flowers were displayed around the walls of the building. The specimen cuts, which were arranged by Mrs. R. G. Wright, being greatly admired. At the northern portion of the building, the letters "N. H. S." fronted by a Beaver, lifelike in appearance made of sumach, met the gaze. It was extremely well contrived and Miss Ballantyne and Mr. W. W. Walter have reason to feel proud of their handiwork. At the south east end were a number of set designs prominent among which were the letters "V. R." surmounted by a crown, the work of Mrs. U. Wilson. Partitioned off in the north east corner was a reproduction of a battleship in full fighting gear, with guns, fighting tops, etc., the work of Mr. W. S. Herrington. The ship was constructed wholly of flowers and had an anchor. The boys were so taken up with the ship that they broke through and stole the anchor. A number of bicycles, beautifully decorated with flowers, were on exhibition. The bicycles belonged to Miss Harshaw, Miss May Ward and Master Daly. In the north west corner, a rustic bower, consisting of ferns, palms and other exotics, was much admired. This was the handiwork of Mr. Thos. Symington. The exhibits were wholly by members of the society. The attendance was large, and the society will emerge with a small balance to their credit. The show was not gotten up for the purpose of making money, but to stimulate an interest in floriculture and the beautiful in nature. The Citizen's Band discoursed sweet music during the evening. Mr. Walter T. Ross, secretary of the Picton Horticultural Society, honored the society with his presence. Mr. Ross brought with him a lemon of his own growing for exhibition. He expressed himself as delighted with the show.

Do not fail to see the eye specialist, at Perry's drug store on Sept. 20th and 21st. He fits others fail. 40-b

Furnishings at Cost

For the next thirty days we will offer, for cost, all Summer Furnishings, such as

UNDERWEAR,
SUMMER COATS AND
VESTS.
FANCY VESTS
STRAW HATS, Etc.

Our Fall Woollens have arrived and now is the time to select your Fall Suit.

B. J. Hogan & SON,

Sole agents for the Wilkinson and Henry Carter English Hats.

Fat of all Kinds at Pollard's.

in the last mountains and we had the pleasure of a visit to Polmateer's ranch, which embraces 4000 acres. The cattle on this ranch were all fat and glossy and we could hardly credit the assertion that they received no grain of any kind. We also met Mr. John Polmateer, who is looked upon as one of the best hunters in that district. John has had many interesting experiences in chasing the deer and hunting the bear, and an evening spent in his company will, "like Oliver Twist's experience with the Parish," give one a taste for more. On Polmateer's ranch there lies, surrounded by high rocks, a pretty sheet of water known as Donahue's lake. It is about a mile in length and a half-a-mile in width. Black bass, pike and masco are said to abound in it, but this was not confirmed by the experience of our party. It is interesting to "hello" from the centre of the lake and listen to the wonderful echoes that come back to you from the rockbound shore. A short distance from Polmateer's ranch is the residence of Mr. Brown, the only human habitation in that neighborhood for miles. From a cursory glance from the road at Mr. B's farm one would be led to imagine that there was not enough land on the place to give decent sepulchre to the remains of an overgrown tom cat. A look over the place soon disabuses your mind of this idea. Mr. Brown has this year as fine a field of wheat, we venture to say, as there is in the county of Lennox and Addington. Mr. Brown has a lake on his place also. It goes by the name of Little Mitten, and like Donahue lake is full of fish also. But for game fishing commend us to the Clare river. There the fish not only abound, but are get-at-able. Black bass, pike, pickerel and masco, and if you are fond of soup, turtles abound. The farms in the vicinity are really excellent and large crops have been garnered this season. On the Clare river resides an intelligent old gentleman, Mr. Flannigan, whom we had the pleasure of a talk with. Mr. Flannigan has passed the allotted span, but is still hale and hearty. He settled on his farm fifty years ago, and from an unbroken forest converted it into the well cultivated property it is to-day. Mr. Flannigan's sons are fine, strapping, hospitable gentlemen, whom it is a pleasure to meet. There are a great many Irishmen in this neighborhood and they are all friendly and obliging. We enjoyed our trip, among the gold bearing rocks of Addington immensely and some day may venture back again.

Mrs. Wm. J. Geddis died at Deseronto last week.

Guy Bros. are booked to appear in Napanee on Oct. 1st.

There are 28 pupils attending the Napanee Model School.

Mr. Polley, a respected resident of Stella, died on Tuesday.

Great variety of pens and pencils at Pollard's bookstore.

Mrs. Milsap passed away at Odessa last week after a lingering illness.

Wm. Walsh, aged 65, died at his home in the 5th con. of Tyendinaga last week.

The Methodist Sunday School had a very successful excursion to Glenora last Friday.

Hood's Pills are the only pills to take with Hood's Sarsaparilla. Easy and yet efficient.

A. E. Taylor wheeled from Tweed to Napanee on Sunday in three hours and ten minutes.

A pretty wedding was solemnized at Yarker on the 1st inst. when Miss Bertha, daughter of Rev. J. Anderson, was united in wedlock to Dr. M. F. Cross, of Oshawa.

Dr. Mecklenburg O.S.D.R.O. the most eminent eye specialist will be at Perry's drug store on Sept. 20th and 21st, to fit and adjust properly glasses to the defective sight. 40-b

The Methodist Sunday School of Cressy, ran an excursion to Napanee per Str. Reinder, yesterday. There was a good sized crowd on board and the young people seemed to be enjoying themselves.

Jack Milligan purchased a cow yesterday and brought it home. He left it in his yard. The bovine jumped the fence, swam across the river, and ran home. "Jack" had to make another trip after the cow.

The best in town at reasonable prices is what you want, why not leave your watch with the most competent watchmaker in town. Our repair trade is this year ahead of last and the largest in town. Satisfaction guaranteed as Chinneck attends personally to this department. Try us if it is for the first time and see if we cannot please you. F. Chinneck's Jewelry Store.

THE BIG STORE

SEPTEMBER 3rd, 1897.

Fall Announcement

1897.

PROSPERITY! PLENTY!

Heavy Harvests, High Prices,

Good Times Back Again.

BETTER TIMES for the dry goods men, too ; though never any more high prices for them. We don't pretend to be glad of that. We didn't go into business for the purpose of making things cheap for our fellow-man. Some stores advertise that they did, and you smile, gently. Ours is not a charitable enterprise. We sell cheap, because we have to—because if we didn't sell goods cheapest, some one else would sell them. And we have enough business sense to know that dry goods prices must remain low, and must be lowest in the small towns. So we hope for good times—not from better profits. but from bigger business. You can afford to spend more money this year. We want to get every last cent of it that attractive goods, square dealing and good service, can bring our way. And we've made ready for a big fall business in

DRESS GOODS.

THAT MEANS that we've bought an unusually big stock of dress stuffs ; also that we have ventured into some better qualities in dresses than we've usually sold. Each year the dress trade runs more to single dress patterns, and qualities that formerly cost fourteen or fifteen dollars a dress are now thrown in the shade by dresses at five and six dollars. It does not cost anything extra to have the only dress of a certain shade and pattern. We have gone in pretty heavily for pretty single patterns, but we won't wait till the end of the season before we begin to sell them cheap. They are going (and coming) every day now. And we make the deliberate statement that we can show you new dress goods at fifty cents a yard that have more style, more beauty, and more quality, than last year's dollar goods. We welcome ladies that are looking around, and do not urge you overmuch to buy. We claim that we have the best equipped lining and trimming departments in Napanee, and our Miss BARRETT has no superior for stylish dresses or mantles. And that brings in

Mantles and Mantle Fabrics.

THE FIRST CONSIGNMENT of our imported mantles will be taken out of bond this week ; others are following fast. The chilly evenings hint at mantles and wraps already—suppose you look in and see them. We intend to keep our place as the largest handlers of mantles in our vicinity, and we are proud of these values. Cloakings of most kinds are here already, and are winning much praise. The range of styles is wide, the values exceptional. We are making quick sales in velvets for capes, at prices that most retailers pay for them ; and in light-weight cloths for capes and costumes, in which our range is particularly good.

retainers pay for them; and in light-weight clothes for capes and costumes, in which our range is particularly good.

We have bright new goods and right value in these lines:

Wrapperettes

Charming Patterns.

Table Linens

At Right Prices.

Grey Flannels

Great Values.

Art Draperies

New and Cheap.

New Tailoring Goods

AND

New Clothing

Will have special mention later.

Lahey & McKenty's.

ASSESSMENT INSURANCE.

The failure of the Massachusetts Benefit Association involved a number in this district who will be interested in the following from the New York Tribune. Just before the Association came to an end the assessment was raised to an almost prohibitory amount with the hope of "freezing out" the members. A number of policy holders paid the extra assessment while a great number dropped out without paying it. The question now arises if those members are not liable for the assessment. The following is the article in question:—

"The disastrous failure of the Massachusetts Benefit Life Association, leaving upward of \$1,000,000 in unpaid death claims, and thousands of people who are now unable to get insurance on account of age or physical infirmity, calls for serious thought. Do the laws regulating such associations have any value, or is the system itself inherently weak? The insurance laws of Massachusetts have often been referred to as model enactments, and yet the Insurance Commissioner of that State has recently spoken of the failure of this association in a manner that must cause great distrust in their efficiency. He says: 'Claimants will be mighty fortunate if they get fifty cents on a dollar.' Then he was asked: 'Do you think the association would have been all right financially if the policy-holders had all paid the last assessment that was demanded?' He replied emphatically: 'No,' and with great earnestness he continued: 'The results would have been exactly the same had every single policy-holder paid all his assessments up to date. The whole system is wrong.'"

If Commissioner Merrill is right, something should be done, and done quickly, to protect the rights of people holding assessment certificates in this State. The retirement from this State, or the failure of 233 kindred associations within a few years, as shown in our Albany correspondence of to-day, takes on added significance in the light of Commissioner Merrill's remarks. Add to this the question of the liability of members for unpaid assessments, and the situation is certainly worthy of attention. Repeated decisions by the courts of this and other States suggest the question whether the mere lapsing of a certificate in one of these associations releases a member from liability. The default in the case of the Massachusetts Benefit Life is only partly indicated in the fact that four hundred families of deceased members, beneficiaries under matured certificates, will, in the opinion of the Insurance Commissioner of Massachusetts, "be mighty fortunate if they get fifty cents on a dollar." The failure of this association leaves thousands of people without any protection who have for years paid the

account of age or physical weakness, find themselves unable to secure protection elsewhere. The extent of the default in this particular no one can surely estimate. The Insurance Department of this State may properly turn its attention to the subject so far as it affects the interests of the people at large.

Boils, pimples and eruptions, scrofula, salt rheum and all other manifestations of impure blood are cured by Hood's Sarsaparilla.

A Graduate of Toronto University says: "My children have been treated with Scott's Emulsion from their earliest years! Our physician first recommended it and now whenever a child takes cold my wife immediately resorts to this remedy, which always effects a cure."

Mr. Phil Vanaelstine landed a 20 lb masco while out cruising in the Dauntless at Hay Bay last Friday. Several members of the party attempt to cast an asperson on it! It's piscatorial prowess by hinting that the fish was in an exhausted condition before he caught the "troll."

Practise Economy in buying medicine as in other matters. It is economy to get Hood's Sarsaparilla because there is more medical value in Hood's Sarsaparilla than in any other. Every bottle of Hood's Sarsaparilla contains 100 doses and will average, taken according to directions, to last a month, while others last but a fortnight.

One of our civic officials while in an American city noticed that milk vendors were counselled to issue milk tickets on the plan of street car tickets, viz, tickets in sheets with perforations between each ticket. A ticket once used, cancelled, and not used again. This gives clean tickets always and as it is a common practice to place tickets within pitchers or pails the danger of contagion is lessened.

Writing inks of all colors, and note paper and envelopes in the fashionable shades, may be had at Pollard's bookstore.

One Source of Pain and Suffering Under Human Control.

The remedy known as South American Kidney Cure never fails to give relief in six hours in all derangements of the kidneys or bladder. Bright's disease, diabetes, inflammation or ulceration of the kidneys, neuralgia, consumption, hemorrhage and catarrh of the kidneys, inflammation of the bladder, etc. It purifies and regulates the urine, removes sediment in urine and prevents scaling. It is worth a thousand times its cost for prostatic troubles in the old, such as enlargements, inflammation

Ed. Smith was struck by a bursting wheel in Matthew & Co's barrel works at Trenton on Saturday and instantly killed.

At the cheese board on Wednesday afternoon 635 boxes were offered, 135 white and 500 colored. 150 colored sold at 9¢. The balance changed hands after the close of the board.

Why not buy your school books at the office of this paper. We make our own scribbles, of superior paper, and sell school supplies of all kinds as cheap as the cheapest. Good lead pencils from 1c. each, and fine scribbling books 100 pages, two for 5c. or 3c. each.

The Woman's Missionary Society met this week and elected the following officers: Pres., Mrs. Edwards; Vice-Pres., Mrs. Parker; 2nd Vice-Pres., Mrs. J. Moore; Rec. Sec., Mrs. W. T. Gibbard; Corresponding Sec., Miss Edwards; Treas., Mrs. Madole.

You better open your eyes to the fact A. S. Kimmery is selling best coal oil 15c. per gal.; 23 lbs. best granulated sugar \$1; No. 1 Western Flour, 2.75 per 100; quart self sealers 70c. per doz.; Tobacco, 35c. per lb. Our 25c. tea beats the world, and our 15c. tea equals all others at 25c. Paine's Celery Compound 85c. per bottle. Carter's Little Liver Pills 15c. per bottle.

Mr. Edwards, section boss on the G.T.R. had a suit of clothes and a pair of boots stolen from his house near the G.T.R. station on Saturday night. A visit to the tramps' resort was made and Wm. Stonehouse, an eighteen-year-old emigrant boy was discovered with the missing articles on his person. He was brought before Magistrate Daly who committed him to the Central Prison for 6 months.

The shingle, saw and griet mills of James Woodruff, Sydenham, along with the contents, sheds and lumber, were destroyed by fire at 11.30 on Tuesday night. The villagers confined the flames to the mills. Soon after, the residence of T. P. Holland was found in flames. Oil had been thrown over its side and end and set ablaze. It is generally felt that the fires were the work of incendiaries.

Mr. W. Dawson, a retired farmer, who at one time conducted a farm near Napanee, was overcome by soaping and died on Monday. He was 73 years of age and the father of A. Dawson, of Napanee, and George, James and Wesley, of Ernestown.

Our spectacle trade is on the rapid increase which means successful fitting in the past and sure success in the future. If wanted the best of reference can be given both in town and outside. Every case guaranteed. If your headaches have not stopped try A. F. Chinneck. It will cost nothing. Test-

Church of England Notes.

PARISH OF ADOLPHUSTOWN. Thanksgiving service. The annual Thanksgiving Service for the blessings of Harvest will (D.V.) be held in St. Paul's church, Sandhurst on Sunday morning next at 11 o'clock.

PARISH OF CAMDEN. Services Sunday next. St. Anthony, Yarker, Morning Prayer, Holy Communion, 10:30; St. Luke, Camden East, 8 o'clock; St. Jude, Napanee Mills, 7 o'clock; St. John, Newburgh, 7 o'clock; Hinch P. O., Orange Hall, S. S. 2 o'clock, Services 3 o'clock.

Mrs. Grange, of Napanee, will deliver an address in the Methodist Church, Selby, on Sunday evening next in behalf of the W. M. Society.

WANTED, HELP.
